Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires.

## Table 9

**Estimates of Employment and Earnings, by Firm Size, for Selected Industries, Canada and Provinces.**

British Columbia's proportion of employment in firms of 200 or more employees is estimated at 49.2% for November 1992. It is the lowest percentage of employment for firms of 200 or more employees among the provinces. Average hourly earnings in British Columbia, at \$18.22, are the highest in the country for employees in large firms.

## Tableau 9

**Estimations de l'emploi et de la rémunération, selon la taille de l'entreprise, pour une sélection d'industries, Canada et les provinces.**

La portion d'emploi en novembre 1992 des entreprises de 200 salariés et plus pour la Colombie-Britannique est estimée à 49.2% en novembre. Par rapport aux autres provinces, cela représente le plus faible pourcentage d'emploi pour ces entreprises. Le plus haut taux horaire moyen des entreprises de 200 salariés et plus au pays est rapporté par la Colombie-Britannique, soit \$18.22.

# Annex 1

## Concepts and Methods

---

### Objectives

The Survey of Employment, Payrolls and Hours (SEPH) is primarily designed to provide monthly estimates of the total number of employees on payrolls, average weekly and hourly earnings and average weekly hours for Canada, provinces and territories at detailed industry levels.

### Target Population

The target population is all employers in Canada except those primarily concerned with agriculture, fishing and trapping, private household services, religious organizations and defence services. SEPH draws its sample from the Business Register maintained by the Business Register Division of Statistics Canada.

### Data Sources

The statistics contained in this report are based on information obtained from employers of firms of all sizes and from the Public Institutions Division in Statistics Canada. All information except that related to employment and payroll statistics for the government units (federal, provincial and local levels of government) are provided by firms.

### Data Collection

SEPH has four methods of data collection. Questionnaires are mailed out each month to the payroll office of employers. Telephone interviews are used for respondents who express a preference for being surveyed by telephone. Computer printouts are supplied by those respondents who prefer to report their data through their computerized payroll system. SEPH, via an exchange of data arrangement between the Labour and Public Institutions Divisions of Statistics Canada, is supplied with government units records providing general government services which are under the collection responsibility of the Public Institutions Division.

### Reference Period

The SEPH reference period is the last seven days in any specified month, but the questionnaire asks respondents to report for the last pay period in the month. When the reported pay period is longer than

## Concepts et méthodes

---

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail (EERH) sert principalement à fournir des estimations mensuelles du nombre total de salariés inscrits sur les listes de paye, des gains hebdomadaires et horaires moyens, et des heures hebdomadaires moyennes pour le Canada, les provinces et les territoires à des niveaux détaillés selon l'activité économique.

### Population cible

La population cible comprend tous les employeurs du Canada, sauf ceux dont les activités relèvent principalement des secteurs de l'agriculture, de la pêche et du piégeage, des services domestiques, des organismes religieux et des services de la défense. L'échantillon de l'EERH est établi à partir du registre des entreprises qui est tenu à jour par la Division du registre des entreprises de Statistique Canada.

### Sources des données

Les statistiques contenues dans le présent bulletin sont fondées sur des renseignements recueillis auprès des employeurs d'entreprises de toutes tailles et de la Division des institutions publiques de Statistique Canada. Tous les renseignements sauf ceux qui ont trait à l'emploi et à la rémunération dans les unités des administrations publiques (aux niveaux fédéral, provincial et local) sont fournis par les entreprises.

### Collecte des données

Quatre méthodes sont utilisées pour la collecte des données de l'EERH. Chaque mois, des questionnaires sont envoyés par la poste au service de paye des entreprises. Les répondants qui le désirent peuvent être interviewés par téléphone. D'autres choisissent de transmettre leurs données au moyen de leur système automatisé d'administration de la paye. Dans le cadre d'une entente d'échange de données conclue entre la Division du travail et la Division des institutions publiques de Statistique Canada, les données de l'EERH relatives au fichier d'unités d'administration publiques qui assurent des services gouvernementaux généraux sont fournies par la Division des institutions publiques qui est chargée d'en faire la collecte.

### Période de référence

La période de référence de l'EERH correspond aux sept derniers jours d'un mois donné, mais les renseignements que les répondants doivent indiquer sur le questionnaire portent sur la dernière période de paye du mois. Lorsque la période de

one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. Reference week adjustments are also made for strikes/lockouts and layoffs.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by questionnaires mailed monthly to a sample of about 56,000 establishments selected out of a universe of about 800,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

## Terms and Definitions

**Establishment:** For statistical purposes it is the smallest entity capable of reporting statistics of economic production, typically a factory, mine, store or similar unit.

**Firm:** A firm is any business or institution whether incorporated or not; it comprises sole proprietorships, partnerships, companies and other forms of organizations.

**Industry classifications:** On the basis of its principal activity, each establishment is assigned an industry code according to the 1980 Standard Industrial Classification. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. SEPH has 281 industry groups in scope. For analytical purposes, we have created special groupings which are not part of the Standard Industrial Classification.

- a) Industrial aggregate (041- 999) represents the sum of all the industries included in the survey.
- b) Goods-producing industries (041-449)(491-499) comprise forestry, mining, manufacturing, construction and other utilities.
- c) Service-producing industries (451-484)(501-999) consists of transportation, communication and storage, trade, finance and insurance, services (except religious organizations and private households) and public administration (except for military personnel, and other government services)

paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye visée. Des rajustements sont faits aussi pour tenir compte des grèves, lock-out et mises à pied survenant durant la semaine de référence.

## Méthodologie

Les statistiques contenues dans la présente publication sont fondées sur les résultats d'une enquête effectuée par sondage menée auprès d'unités déclarantes. Les données sont recueillies par questionnaires envoyés par la poste tous les mois à un échantillon d'environ 56,000 établissements prélevés d'un univers d'environ 800,000 unités. L'échantillon représente toutes les activités économiques que vise l'enquête, toutes les provinces et tous les territoires, ainsi que toutes les tailles d'unités. Chaque mois, l'univers et l'échantillon font l'objet d'une mise à jour pour tenir compte des créations et des disparitions.

## Termes et définitions

**Établissement:** À des fins statistiques, l'établissement est la plus petite unité pouvant fournir des données sur la production économique. En général, une usine, une mine, un magasin ou à une unité semblable.

**Entreprise:** Toute entreprise commerciale ou institution, constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une association, d'une société ou d'une autre forme d'organisation.

**Classement par activité économique:** Un code d'activité économique tiré de la Classification type des industries de 1980 est attribué à chaque établissement selon sa principale activité. Les industries et les différents groupes industriels sont décrits dans le manuel "Classification Types des Industries 1980" catalogue 12-501. Dans les tableaux de cette publication une colonne est indentée "CTI 1980" ces codes correspondent à ce manuel. On compte 281 groupes d'activités visées par l'EERH. À des fins analytiques, nous avons créé des groupes spéciaux qui ne figurent pas dans la Classification type des industries.

- a) Ensemble des industries (041-999) - Représente la somme de toutes les diverses activités économiques visées par l'enquête
- b) Branches productrices de biens (041-449)(491-499) - Comprend les forêts, les mines, les manufactures, la construction et autres services publics
- c) Branches productrices de services (451-484)(501-999) - Englobe les transports, les communications et l'entreposage, le commerce, les finances et les assurances, les services (sauf les organismes religieux et les ménages privés) et l'administration publique (excepté le personnel militaire et autres services gouvernementaux)

d) Durable goods manufacturing includes wood industries (251-259), furniture and fixtures (261-269), primary metal industries (291-299), fabricated metal products (301-309), machinery industries (311-319), transportation equipment (321-329), electrical and electronic products (331-339) and non-metallic mineral products (351-359)

e) Non-durable manufacturing is the sum of food industries (101-109), beverage industries (111-114), tobacco industries (121-122), rubber products (151-159), plastic products (161-169), leather products (171), primary textile industries (181-183), textile product industries (191-199), clothing industries (243-249), paper and allied products industries (271-279), printing, publishing and allied industries (281-284), refined petroleum and coal products (361-369), chemical and chemical products (371-379) and other manufacturing industries (391-399)

f) Commercial services is the sum of business service industries (771-779), accommodation service industries (911-914), food and beverage service industries (921-922), amusement and recreational service industries (961-969), personal service industries (971-979), membership organization industries (982-986) and other service industries (991-999)

g) Non-commercial services is the sum of educational and related service industries (851-859) and health and social service industries (861-869)

h) Banks (700) comprises the Central Bank (701) and Chartered Banks and other banking-type intermediaries (702)

i) Other amusement and recreational services (960) consists of commercial spectator sports (964), gambling operations (966) and other amusement and recreational services (969)

j) Public Administration (812-837) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level

**Geographic classification:** Reporting units are assigned to a province or territory. The statistics contained in this report are based on the 1986 version of the Standard Geographic Classification.

d) Fabrication de biens durables - Comprend les industries : du bois (251-259), de meuble et des articles d'ameublement (261-269), de première transformation des métaux (291-299), de fabrication des produits métalliques (301-309), de machinerie (311-319), du matériel de transport (321-329), des produits électriques et électroniques (331-339) et les industries des produits minéraux non métalliques (351-359)

e) Fabrication de biens non durables - Englobe les industries: des aliments (101-109), de la boisson (111-114), les industries du tabac (121-122), des produits en caoutchouc (151-159), des produits en matière plastique (161-169), du cuir (171), de la première transformation du textile (181-183), des industries des produits textiles (191-199), de l'habillement (243-249), du papier et produits connexes (271-279), de l'imprimerie, édition et industries connexes (281-284), des produits raffinés du pétrole et du charbon (361-369), des produits chimiques (371-379) et les autres industries manufacturières (391-399)

f) Services commerciaux - englobe les industries: des services aux entreprises (771-779), industries de l'hébergement (911-914), industries de la restauration (921-922), industries de services de divertissements et loisirs (961-969), industries des services personnels (971-979), associations commerciales (982-986) et autres industries de services (991-999)

g) Services non-commerciaux comprend les industries: des services d'enseignement et services annexes (851-859) et les industries des services de soins et services sociaux (861-869)

h) Banques (700) - Comprend la banque centrale (701) et les banques à charte et autres intermédiaires de type bancaire (702)

i) Services de divertissements et de loisirs (960) - Il s'agit des sports commerciaux (964), des loteries et jeux de hasard (966) et d'autres services de divertissement et de loisir (969)

j) Administration publique (812-837) - Comprend seulement les établissements dont les activités ont un caractère essentiellement gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics

**Classement géographique :** On attribue les unités déclarantes à une province ou à un territoire. Les statistiques contenues dans le présent document sont fondées sur la Classification géographique type de 1986.

**Paid absence:** Paid absence includes paid holidays, sick leave including industrial injury and personal leave such as bereavement leave, jury duty etc.

**Standard work week:** The hours in the standard work week constitute the average number of hours of work normally scheduled in a work week.

**Take all units:** Take all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. Included are all firms or organizations with 200 or more employees, units of government departments, crown corporations, combined companies and combined establishments.

**Take some units:** All other firms in the universe which have a known probability of selection are take some units.

### **Employee**

All persons drawing pay for services rendered or for paid absences and for whom the employer must complete a Revenue Canada T-4 Supplementary Form constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self employed, unpaid family workers, persons working outside Canada, military personnel, and casual workers for whom a T-4 is not required. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

- a) **Employees paid by the hour:** any employee whose basic wage is expressed as an hourly rate

**Congés payés :** Les congés payés comprennent les jours fériés payés, des vacances, des congés de maladie ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire ext.

**Semaine normale de travail :** Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement déterminées pour une semaine.

**Unités à tirage complet :** Les unités à tirage complet sont des unités déclarantes d'entreprises ou d'organisations qui font partie tous les mois de l'échantillon de l'enquête. Elles comprennent toutes les entreprises ou organisations de 200 salariés ou plus, les unités des services gouvernementaux, les sociétés de la couronne, les sociétés combinées et les établissements combinés.

**Unités à tirage partiel :** Toutes les autres entreprises qui ont une probabilité connue d'être choisies dans l'échantillon de l'enquête sont des unités à tirage partiel.

### **Salarié**

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada est un salarié.

Le terme "salarié" désigne les salariés à plein temps et à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, administrateurs, associés et autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les personnes travaillant à l'extérieur du Canada et le personnel militaire et pour les employés occasionnels dont l'employeur n'est pas tenu de remplir la formule T4. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (c.-à-d. les personnes en grève, en congé non payé, les personnes recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'un régime analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie sont quand même considérés comme des salariés.

Les salariés sont classés dans les catégories suivantes :

- a) **Salariés rémunérés à l'heure:** tout salarié dont la rémunération de base est calculée selon un taux horaire.

With the exception of the Elementary and Secondary Education (851), Post Secondary (852) and University education (853) industries this category of employment represents **non-teaching Staff**: all employees other than teachers and academic staff i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)

- b) **Salaried employees**: any employee whose basic remuneration is a fixed amount for at least one week.

With the exception of the Elementary and Secondary Education (851), Post Secondary (852) and University education (853) industries this category of employment represents **Teaching Staff**: those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

- c) **Other employees**: those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

With the exception of the Elementary and Secondary Education (851), Post Secondary (852) and University education (853) industries this category of employment represents **Supply or Substitute Teachers**: teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

## Earnings

**Payrolls**: excludes dollar amounts that are taxable allowances and benefits, certain types of non-wage compensation as well as employer contributions to unemployment insurance, Canada/Quebec pension plans, provincial medical plans, workers compensation and other welfare plans. Annual special payments are excluded while other lump sum special payments are adjusted to coincide with the reference week period.

**Overtime pay**: includes all pay received for the number of hours worked in excess of the standard work-day or work-week.

**Average weekly earnings (including overtime)**: represent gross taxable payrolls divided by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the

Sauf pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853) cette catégorie d'emploi représente le **personnel non enseignant**: tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économiste, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

- b) **Employés**: tout salarié dont la rémunération de base constitue une somme fixe versée pour au moins une semaine.

Sauf pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853) cette catégorie d'emploi représente le **personnel enseignant**: tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

- c) **Autres salariés**: tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de millage, etc.

Sauf pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853) cette catégorie d'emploi représente le personnel **suppléants ou remplaçants**: enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

## Gains

**Rémunération**: ne comprend pas les montants en dollars qui représentent des allocations et des avantages imposables, certains types d'indemnités non salariales ainsi que les cotisations patronales à l'assurance-chômage, au régime de pension du Canada ou au Régime des rentes du Québec, aux régimes d'assurance-maladie provinciaux, aux caisses d'indemnisation des accidents du travail et à d'autres régimes de prévoyance. Les paiements annuels spéciaux sont exclus tandis que les paiements forfaitaire spéciaux sont rajustés de façon à coïncider avec la semaine de référence.

**Rémunération du temps supplémentaire**: ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

**Gains hebdomadaires moyens (incluant le temps supplémentaire)**: rémunérations brutes imposables divisées par le nombre de salariés. Les heures hebdomadaires moyennes (y compris les heures supplémentaires) sont déterminées en

salaried employees and for the other types of employees.

**Average weekly overtime earnings:** is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

**Average hourly overtime earnings:** is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

**Average hourly earnings (including overtime):** is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). Average hourly earnings is calculated for the hourly-rated employees and for the salaried employees.

**Average hourly overtime earnings:** is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

**Average weekly earnings (excluding overtime):** is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

## Hours

**Average weekly overtime hours:** is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

- a) **Total hours paid:** all hours worked, including overtime hours, plus hours of paid absence (e.g. holidays, sick leave, jury duty, etc.)
- b) **Overtime hours:** the total hours for which overtime was paid. These represent the hours worked.

divisant le total des heures hebdomadaires par le nombre de salariés. Ces données sont calculées à l'égard des salariés rémunérés à l'heure et des employés.

**Gains hebdomadaires moyens du temps supplémentaire:** ces gains sont obtenus en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre de salariés. Ils sont calculés à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

**Gains horaires moyens du temps supplémentaire:** gains calculés pour les employés rémunérés à l'heure en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

**Gains horaires moyens (incluant le temps supplémentaire):** ces gains sont obtenus en divisant les rémunérations hebdomadaires totales par le total hebdomadaire des heures travaillées (le total des heures hebdomadaires est celui qui est déclaré pour les salariés rémunérés à l'heure; pour les employés, les gains sont établis en multipliant la moyenne des heures travaillées pendant la semaine normale de travail par le nombre d'employés). Les gains horaires moyens sont calculés à l'égard des salariés rémunérés à l'heure et des employés.

**Gains horaires moyens du temps supplémentaire:** gains calculés pour les employés rémunérés à l'heure en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

**Gains hebdomadaires moyens (excluant le temps supplémentaire):** ces gains sont déterminés en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires du temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure et des employés.

## Heures

**Heures supplémentaires hebdomadaires moyennes:** ces heures sont obtenues en divisant le total hebdomadaire des heures supplémentaires par le nombre de salariés. Cette moyenne est calculée pour les employés rémunérés à l'heure.

- a) **Nombre total d'heures rémunérées :** ensemble des heures travaillées, y compris les heures supplémentaires, plus les heures de congé payé (par ex., les jours fériés, les congés de maladie, les congés pour fonctions judiciaires, etc.).
- b) **Heures supplémentaires :** total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

## **Sample Design**

### **Survey Frame**

SEPH integrated to the new Business Register beginning with the October 1990 data reference month. The new Business Register is a complete list of all Canadian business entities engaged in economic activity. The objectives of the new BR are to improve coverage of the business universe, achieve greater consistency and comparability among the business surveys and to reduce respondent burden for smaller firms.

The BR consists of the integrated portion (IP) of larger units which are updated regularly through survey feedback, profiling and administrative sources. The non-integrated portion (NIP) comprises smaller payroll deduction records and are updated essentially from administrative sources.

### **Stratification**

For the purpose of the sample selection and for the determination of the survey sample size, the universe of reporting units is stratified into 12 provinces and territories, 16 industry divisions and 4 sizes. (An industry division is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees. The universe of reporting units is further stratified into take-all and take-some categories. The total sample size of SEPH is governed by the objective of a 3.00% coefficient of variation for the estimate of employment at the province by industry division level.

### **Sample Allocation and Selection**

The size of the take-some for the survey has been determined in order to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. Sampling fractions are computed for all cross-classifications of 3 digit SICs, province and size groups. To minimize the sample size, the sample allocation is such that the largest units are the most likely to be selected. However, the sampling fractions cannot be smaller than 0.01. A systematic sample is drawn for every 3 digit industry, province and size group. If the population count is less than 4 at the 3 digit SIC by province by size level, then the sampling fraction is disregarded and all the units are selected. The total sample size is the sum of the number of take-all and selected take-some units.

## **Modèle de l'échantillon**

### **Base de sondage**

On a commencé à utiliser le nouveau registre des entreprises pour réaliser l'EERH à compter du mois de référence d'octobre 1990. Le nouveau registre des entreprises est une liste complète de toutes les entités commerciales canadiennes engagées dans une activité économique. Le RE a pour objet d'améliorer la couverture de l'univers des entreprises ainsi que la cohérence et la comparabilité des données des enquêtes-entreprises, et de réduire le fardeau de réponse des entreprises de plus petite taille.

Le RE comprend la partie intégrée des données sont les unités plus importantes qui sont mises à jour de façon régulière à l'aide des résultats obtenus au moyen d'enquêtes, d'établissement de profils et de sources administratives. La partie non-intégrée comprend les plus petites retenues sur les gains brute qui sont mis à jour principalement à partir de sources administratives.

### **Stratification**

Pour les besoins de l'enquête on détermine la composition de l'échantillon et la taille en stratifiant l'univers des unités déclarantes est stratifié en 12 provinces et territoires, 16 branches d'activité et 4 catégories de taille. (Une branche d'activité est légèrement plus détaillée qu'une activité qui correspond à un code à un chiffre.) La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre catégories de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus. En outre, l'univers des unités déclarantes est stratifié en deux groupes : les unités à tirage complet et les unités à tirage partiel. La taille de l'échantillon global de l'EERH est déterminée en tenant compte du fait que l'on vise un coefficient de variation de 3.00% pour l'estimation de l'emploi au niveau de la province et de la division en fonction des activités.

### **Répartition et choix de l'échantillon**

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau de la branche d'activité et de la province. Des fractions de sondage sont calculées pour tous les classements recoupés au niveau des codes à trois chiffres de la CTI, de la province et par groupe de tailles. Pour minimiser la taille de l'échantillon, l'échantillon est réparti de façon que les unités les plus importantes sont les plus susceptibles d'être choisies. Les fractions de sondage ne peuvent toutefois pas être inférieures à 0.01. Un échantillon systématique est tiré pour chaque combinaison de la CTI niveau des codes à trois chiffres, de la province et de la taille. S'il y a moins de 4 unités au niveau des codes de la CTI à 3 chiffres selon la province et par groupe de tailles, on ne tient pas compte de la fraction de sondage et toutes les unités sont choisies. La taille de l'échantillon est la somme du nombre d'unités à tirage complet et de certaines unités à tirage partiel.

## **Sample Rotation**

Generally speaking, after 12 months, in-sample units are replaced, and are not eligible for reselection for at least 12 months. Hence, approximately 1/12 of the take-some sample is replaced every month. Some units have to stay more than 12 months in sample due to the lack of replacement units at the 3 digit industry, province and size group level.

## **Reliability**

Reliability of the estimates can be assessed by examining sampling errors and by controlling non-sampling errors. These are two types of errors possible in estimates based on a sample survey.

*Sampling errors* occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. The difference with respect to a particular estimate is called the sampling error of the estimate.

*Non-sampling errors* are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the question, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. Efforts to reduce non-sampling errors include careful design of questionnaires, editing of data follow-up of and imputation for non-respondents and thorough control of processing operation. The SEPH program has a head-office Quality Assurance unit that is mandated to reduce non-sampling errors and ensure that concepts and definitions are respected.

## **Indicators of Sampling Errors**

The true sampling error is not known, however, it can be estimated from the sample itself by using a statistical measure called the standard error of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation. Tables of indicators of the coefficients of variation are available on request along with an explanatory note on how to use them to judge the quality of the estimates contained in this publication.

## **Rotation de l'échantillon**

De façon générale, après 12 mois, les unités échantillonnées sont remplacées, et ne peuvent pas être choisies de nouveau avant au moins 12 mois. Par conséquent, le un douzième environ des unités à tirage partiel de l'échantillon est remplacé chaque mois. Il peut arriver que des unités doivent demeurer plus de 12 mois dans l'échantillon à cause du manque d'unités de remplacement au groupe codes d'activités à trois chiffres à la province, à la taille.

## **Fiabilité des estimations**

La fiabilité des estimations est fondée en examinant l'erreur d'échantillonnage et en contrôlant les erreurs non due à l'échantillonnage. Ce sont les deux types d'erreurs possibles dans l'échantillon.

*Les erreurs d'échantillonnage* proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes intervieweurs et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle l'erreur d'échantillonnage de l'estimation.

*Les erreurs non dues à l'échantillonnage* ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. On cherche à réduire le nombre d'erreurs non dues à l'échantillonnage par une formulation soignée des questionnaires, une vérification attentive des chiffres déclarés, le travail de suivi, l'imputation de données aux unités non répondantes et un contrôle rigoureux des techniques de traitement. Il existe une sous-section de contrôle de la qualité au bureau central qui est chargée de réduire le nombre d'erreurs non dues à l'échantillonnage pour l'EERH et de veiller à ce que les concepts et les définitions soient observés.

## **Indicateurs des erreurs d'échantillonnage**

L'erreur d'échantillonnage reste inconnue, on peut cependant l'estimer à partir de l'échantillon en utilisant une mesure appelée écart-type d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation. Des tableaux d'indicateurs de coefficients de variation sont disponibles sur demande ainsi qu'une note explicative sur la façon de les utiliser pour déterminer la qualité des estimations figurant dans la présente publication.

## **Non-Sampling Errors**

SEPH has a statistical quality control program at the data capture, structure updating and data editing stages to minimize non-sampling errors. These programs monitor and control the completeness, accuracy and consistency of the reported survey data. Procedures are in place to follow-up for non-response and to impute for those late responses since SEPH publishes estimates only for the two recent months in any particular reference cycle.

## **Response Rates**

Each month, SEPH releases statistics for the two latest reference months. The "preliminary" month's estimates and the "revised" month's estimates are based on response rates of 80% and 90% respectively for both reporting units and employment.

## **Characteristics of Non-Respondents and Follow-up**

Firms that do not report data diminish the accuracy of the estimates. Non-response may affect the estimates in different ways. Non-response may be divided into those who refuse to report and those who report "late".

Less than one percent of firms surveyed refuse to report data and most refusals are by small firms. About ten per cent of firms report too late to be included in the estimation process at all. Late reporters tend to be large firms and those using the computer reporting service (CRS) for data collection.

Reporting units, which are non-respondents to the initial mailing, are followed up by telephone by the staff of the regional offices of Statistics Canada. If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## **Imputation**

Imputation for non-respondent units, which have been in the survey for more than one month, is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each non-respondent.

For the non-responding units that are new to the survey, imputation is based on other sources of

## **Erreurs non due à l'échantillonnage**

L'EERH comprend un programme de contrôle de la qualité des données qui est appliqué lors de la saisie des données, de la mise à jour des structures et du contrôle des données afin de minimiser les erreurs d'échantillonnage. Ce programme sert à déterminer et à vérifier l'intégrité, la précision et la cohérence des données déclarées. Des mesures sont prévues pour le suivi des cas de non-réponse et pour l'imputation de données dans le cas de déclarations tardives étant donné que les estimations tirées de l'EERH sont publiées seulement pour les deux mois les plus récents de toute période de référence.

## **Taux de réponse**

Chaque mois, des statistiques de l'EERH sont publiées pour les deux derniers mois de référence. Les estimations "préliminaires" du mois le plus récent et les estimations "révisées" du mois qui le précède sont fondées sur des taux de réponse de 80 % et de 90% respectivement à la fois pour les unités déclarantes et l'emploi.

## **Caractéristiques des non-répondants et suivi**

Les entreprises qui ne déclarent pas de données diminuent la précision des estimations. La non-réponse peut influencer sur la valeur des estimations de différentes façons. Les non-répondants peuvent être répartis en deux catégories, soit ceux qui refusent de collaborer et ceux qui remettent leur déclaration en retard.

La proportion des entreprises visées par l'enquête qui ont refusé de fournir des données est inférieure à un pour cent; la plupart des refus sont opposés par les petites entreprises. Environ dix pour cent des entreprises renvoient leur questionnaire trop tard pour que les données puissent être incluses dans le processus d'estimation. Les déclarants tardifs sont habituellement des grandes entreprises et des entreprises qui utilisent le service de déclaration automatisé (SDA) pour la collecte des données.

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Lorsque des unités persistent à ne pas répondre même après le suivi, des données leur sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## **Imputation**

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui sont visées par l'enquête pour la première fois, l'imputation se fonde sur

information such as the employment intention of the unit and the characteristics of the responding units in the same industry group, province and size. Previous months data are used to impute for establishments with more than 200 employees.

### **Coverage Errors**

Two sources of coverage errors associated with using survey frames relate to duplication and undercoverage. Duplication occurs on the frame when payroll deduction records are unable to be linked to their associated businesses residing on the frame. Undercoverage arises due to the time required to classify and/or link new payroll deduction units.

The Methods and Quality Assurance Section of the Business Register Division produces quality measures to monitor the performance of the frame.

### **Data Edit and Correction**

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signalled by the computer edit for review and is subject to correction or acceptance where appropriate.

### **Comparability With Other Data Sources**

#### **Employment**

SEPH payroll employment estimates are frequently compared to the employment estimates provided by the Labour Force Survey (LFS). When comparing the establishment-based SEPH employment estimates to the household-based LFS data, some differences can be quantified and others not. The quantifiable adjustments to the LFS include the addition of multiple job holders and the subtraction of the following: unpaid family workers, self-employed, unpaid absentees (such as workers on strike), incorporated businesses, working partners without employees and the industries excluded from SEPH. The adjustments which are not easily quantifiable include differences,

d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe d'activité économique, de la même province et de la même taille. Les estimations des mois précédents servent à l'imputation des établissements ayant plus de 200 salariés.

### **Erreurs de couverture**

Deux erreurs de couverture découlent des doubles comptes et le sous-dénombrement de la base de sondages. Les doubles comptes se produisent dans la base lorsqu'il est impossible de coupler les enregistrements des retenues sur la paye avec les entreprises correspondantes de la base de sondage. Le sous-dénombrement résulte du temps requis pour classer et (ou) coupler les nouvelles unités de retenues sur la paye avec les entreprises correspondantes.

La section des méthodes et du contrôle de la qualité de la division du Registre des entreprises produit des mesures de qualité pour assurer la bonne représentation de la liste des entreprises.

### **Contrôle et correction des données**

Au départ, les intervieweurs des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut être appelé à confirmer ou à expliquer ses chiffres.

Nos procédés de contrôle nous permettent de comparer les valeurs des principales caractéristiques (nombre de salariés, heures travaillées, traitement par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation est constatée ou que les données semblent incohérentes, l'ordinateur signale le cas, et les données de l'enregistrement sont corrigées ou leur exactitude est confirmée, selon le cas.

### **Comparabilité avec d'autres sources de données**

#### **L'emploi**

Les données sur l'emploi de l'EERH sont souvent comparées aux estimations de l'emploi fournies par l'enquête sur la population active (EPA). Lorsque l'on compare les données de l'EPA qui sont fondées sur les ménages et les estimations de l'emploi de l'EERH qui sont basées sur les établissements, certaines différences peuvent être quantifiées et d'autres, non. Les rajustements quantifiables, dont peuvent faire l'objet les estimations de l'EPA, comprennent l'ajout des personnes cumulant des emplois et la suppression des travailleurs familiaux non rémunérés, des travailleurs autonomes, des absents non rémunérés (les travailleurs en grève par exemple), des entreprises constituées en société, des associés actifs dans des entreprises sans salariés et des activités

errors in SIC coding, differences in reference periods, survey procedures and the unrecorded economy. Also, SEPH covers the Northwest Territories while the LFS does not. The LFS data, which focus on demographic characteristics of the labour force, are reasonable measures of trends within broad industry and occupational groups. The SEPH estimates are more suitable as indicators of employment change over detailed industry groups.

According to the 1980 SIC System, public administration (811-837) contains only those establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. SEPH does not publish defence services (811) and includes civilian defence workers in federal administration. Thus, SEPH publishes public administration data that essentially conforms to this definition. Government establishments engaged in activities such as health and education services and transportation and communication services are classified to the appropriate industries. The Public Institutions Division (PID) publishes government employment data that represent all employees of non-commercial entities under the control of a government.

The quantifiable adjustments to the PID data include the addition of Statistics Canada interviewers and the exclusion of military personnel, government personnel working outside of Canada, employees on unpaid absences and government employees assigned to industries other than public administration. The adjustments which are not easily quantifiable include differences in reference periods, survey procedures and the treatment of extra pay periods. The Labour and Public Institution Divisions conduct a reconciliation process to ensure that the public administration data are compatible.

### **Earnings**

The user community generally focuses on two earnings indicators which are often compared to the average weekly and hourly earnings data produced by SEPH. These two earnings indicators are referred to as the Labour Canada base wage rate settlements and the estimates of Wages and Salaries and Supplementary Labour Income produced by the Labour Division in Statistics Canada.

Labour Canada's wage rate indicator data include only unionized workers covered by major collective agreements representing 500 or more employees. For instance, the Labour Canada Base wage rate, as an indicator of wage change, covers about 10% of the overall SEPH employment. Therefore, the value and

économiques non visées par l'EERH. Les rajustements qui ne sont pas facilement quantifiables comprennent le codage selon la CTI, les différences au niveau des périodes de référence, des procédures d'enquête et les données économiques non déclarées. De plus, les données sur les Territoires du Nord-Ouest sont recueillies par l'EERH, mais non par l'EPA. Les données de l'EPA, qui sont axées sur les caractéristiques démographiques de la population active, sont des mesures raisonnables des tendances au niveau des grands groupes d'activités économiques et de professions. Les estimations de l'EERH constituent de meilleurs indicateurs des changements en matière d'emploi pour les groupes détaillés d'activités économiques.

Selon la CTI 1980 l'administration publique (811-837) comprend les établissements dont les activités ont un caractère essentiellement gouvernemental et les organismes auxiliaires assurant les services internes de l'État. Les services de la défense (811) sont exclus de l'EERH sauf les employés civils oeuvrant dans ce ministère. L'EERH publie des données pour l'administration publique par rapport à cette définition. Les établissements à caractère gouvernemental oeuvrant dans le domaine de la santé, l'éducation et le service des transports et de la communication sont classifiés par rapport à leur activité respective. La Division des institutions publiques (DIP), publie des données sur l'emploi pour les entités non-commerciales gérées par le gouvernement.

Les ajustements quantifiables aux données de DIP comprennent les intervieweurs de Statistique Canada mais excluent le personnel militaire, les personnes travaillants, à l'extérieur du Canada, en congé non payé et les personnes dont l'activité est autre que l'administration publique. Les ajustements qui ne sont pas obtenus facilement, comprennent des différences dans la période de référence, les procédures et le traitement des périodes de paye supplémentaire. La Division du travail et la Division des institutions publiques font une réconciliation afin de s'assurer que les données soient compatibles.

### **Gains**

Les utilisateurs optent généralement pour deux indicateurs de rémunération qui sont souvent comparé à la rémunération hebdomadaire et horaire produite par l'EERH. Ces deux indicateurs de rémunération représentent le taux salarial établi de Travail Canada et les estimations des salaires et traitements et du revenu supplémentaire du travail produites par la division du travail de Statistique Canada.

Les données sur le taux salarial de base de Travail Canada ne portent que sur les travailleurs syndiqués visés par des conventions collectives importantes représentant 500 employés ou plus. Plus précisément, le taux de base de Travail Canada, qui sert d'indicateur de l'évolution des traitements, porte sur environ 10% de l'ensemble des données

relevance of the Labour Canada base wage rate as an indicator of wage change should be carefully considered. The estimates of wages and salaries produced by the Labour Income Section are primarily based on annual T-4 supplementary administrative records provided by Revenue Canada Taxation which are projected forward on a monthly/quarterly basis using SEPH and LFS data. Supplementary Labour Income (SLI), which accounts for about 11% of total Labour Income, are not measured by SEPH. SLI includes employer contributions to pensions plans, medical and other welfare plans, Canadian and Quebec Pension Plan and workers' compensation. The labour income estimates, which are a more comprehensive source of employment compensation, do not provide any information on wage rates. The SEPH data for average weekly/hourly earnings as well as Labour Canada's base wage rate statistics are imperfect indicators of wage rate changes because they are subject to compositional shifts by industries, by provinces and changes in underlying rates of pay.

### **Comparability Over Time**

SEPH data have been historically corrected to produce consistent time series from January 1983 to date. The revised time series, which incorporated corrections for major discontinuities, reflect economic change over the 1983-1991 period. By reducing the statistical impacts of sampling and non-sampling errors, the SEPH historically-corrected series can be considered to be more consistent trend measures of payroll employment, earnings and paid hours.

### **Products**

#### **Seasonal Adjustment**

It is common practice to publish most economic indicators in seasonally adjusted and unadjusted forms. Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as usual changes in weather, reduced or expanded production and the opening and closing of schools. Since these seasonal events follow a more or less regular pattern each year, their influence on statistical trends can be eliminated by adjusting the statistics from month-to-month. Seasonal adjustment is imperfect, so if a time series has irregular variation that is larger than the seasonal variation, the seasonally adjusted series will be a poor estimate.

sur l'emploi de l'EERH. Par conséquent, il convient de déterminer avec soin dans quelle mesure le taux salarial de base de Travail Canada s'avère valable et pertinent comme indicateur de la variation des traitements. Les estimations des traitements et salaires produites par la Section du revenu du travail sont fondées en grande partie sur les données des fichiers administratifs renfermant les feuillets annuels T-4 Supplémentaire fournies par Revenu Canada (Impôt); elles font l'objet de projections mensuelles/trimestrielles à l'aide des données de l'EERH et de l'EPA. L'EERH ne mesure pas le revenu supplémentaire du travail (RST), qui représente environ 11% du revenu du travail total. Le RST comprend les cotisations patronales aux régimes de retraite, aux régimes d'assurance-maladie et à d'autres régimes de prévoyance, au Régime de pensions du Canada, au Régime de rentes du Québec et à la caisse d'indemnisation des accidents du travail. Les estimations du revenu du travail, qui brossent un tableau plus complet de la rémunération du travail, ne fournissent pas de renseignements sur les taux de traitement. Les données de l'EERH sur les gains hebdomadaires/horaires moyens et les données sur le taux salarial de base de Travail Canada sont des indicateurs imparfaits de l'évolution des taux de traitement du fait qu'elles sont touchées par des variations dans la répartition des unités selon l'activité économique et la province, et par des changements dans les taux de rémunération sous-jacents.

### **Comparabilité dans le temps**

Les données de l'EERH ont été corrigées à partir de janvier 1983 de façon à assurer la cohérence des séries chronologiques à date. Les séries chronologiques révisées, qui comportaient des ruptures importantes, donnent maintenant un meilleur aperçu de l'évolution économique pour 1983-1991. Maintenant que l'incidence statistique des erreurs d'échantillonnage et des erreurs non dues à l'échantillonnage a été réduite, les séries chronologiquement révisées de l'EERH constituent des mesures plus cohérentes des tendances relatives à l'emploi, à la rémunération et aux heures de travail.

### **Produits**

#### **Désaisonnalisation**

Il est de pratique courante de publier la plupart des indicateurs économiques sous forme désaisonnalisée et non désaisonnalisée. Les fluctuations relevées dans les séries chronologiques d'ordre économique sont causées par des mouvements saisonniers, cycliques et irréguliers. Dans une série désaisonnalisée, les mouvements saisonniers ont été supprimés. Les mouvements saisonniers sont définis comme étant ceux qui sont causés par des événements qui se produisent chaque année, par exemple les changements climatiques habituels, le ralentissement ou l'accroissement de la production, et l'ouverture et la fermeture des établissements d'enseignement. Comme ces événements saisonniers se produisent à des intervalles annuels assez réguliers, leur incidence sur les tendances statistiques peut être supprimée en rectifiant les statistiques d'un mois à l'autre.

In the opinion of the Time Series Division of Statistics Canada, the unadjusted series will probably be a better estimate than the poorer seasonally adjusted series.

#### ***Fixed-Weighted Earnings Index***

A set of fixed-weighted average hourly and weekly earnings index data has been constructed to deal with the impact of changes in the employment mix between industries, provinces/territories and salaried and hourly employees. This index provides a better indicator of the underlying trends in wage rates than the variable weighted earnings series.

This data series corrects the compositional changes of employment by re-aggregating SEPH survey information using fixed rather than variable weights for the paid hours. Overtime is excluded because it is an important source of compositional change in some industries. Statistics Canada's time base year for any index, such as the CPI, is 1986=100. Thus, for consistency purposes, the time base year for the fixed-weighted earnings index is the same.

#### ***Diffusion Index***

The diffusion index measures the dispersion of change for the SEPH variables and represents the fraction of industries which had year-over-year increases in the value of a variable. The SEPH diffusion index data are available for selected industry groups for Canada employment, average weekly hours, average hourly earnings and average weekly earnings adjusted for inflation.

The diffusion index can be used to assess how broad based a change in level is for SEPH variables such as employment or average weekly hours for the Industrial Aggregate. The index is particularly useful in analyzing trends in cyclically-sensitive industries such as manufacturing and trade.

#### ***Revision Policy***

On a monthly basis, the preliminary data will be revised in the following month. On an annual basis, seasonally-adjusted and raw data will be revised with the release of the December revised data for the calendar year. The SEPH Program will keep up to 4 years open for revision to coincide with the revisions made every June by the Canadian System of National Accounts Divisions in Statistics Canada.

From time to time, an historical revision is necessary for changes related to new data sources and revised industry classifications and frame changes.

La désaisonnalisation n'est pas parfaite; alors si une série chronologique présente des variations irrégulières plus importantes que les variations saisonnières, cette série désaisonnalisée sera une pauvre estimation. D'après la Division des séries chronologiques de Statistique Canada, il est alors préférable d'utiliser une série non désaisonnalisée.

#### ***Indice des gains à pondération fixe***

La série à pondération fixe des gains horaires et hebdomadaires moyens a été conçue pour traiter l'impact des changements dans l'emploi entre; les industries, provinces/territoires, les employés et les employés payés à l'heure. Cet indices est un meilleur indicateur des tendances des gains à celles des gains pondérés.

Il s'agit d'une série de données qui corrige les changements dans la composition de l'emploi en groupant différemment les données de l'EERH au moyen d'une pondération fixe plutôt que variable pour les heures payés. Le temps supplémentaire est exclu parce que cet élément influe de façon considérable sur la composition de l'emploi pour certaines activités économiques. L'année de référence déterminée par Statistique Canada pour tout indice, par exemple l'IPC, est 1986=100. Par conséquent, c'est aussi celle qui a été établie pour l'indice des gains à pondération fixe, pour assurer la cohérence.

#### ***Indice de diffusion***

L'indice de diffusion indique l'ampleur des changements intervenues au niveau des variables de l'EERH et représente la fraction des industries pour lesquelles on a enregistré une croissance annuelle de la valeur de cette variable. Les indices de diffusion rendus disponibles par l'EERH sont l'emploi au Canada, les heures hebdomadaires moyennes travaillées, la rémunération horaire et hebdomadaire moyenne après correction pour l'inflation.

Les indices de diffusion permettent de repérer la tendance générale adoptée par les variables de l'enquête tel que l'emploi ou les heures hebdomadaires moyennes pour l'ensemble des industries. L'indice est particulièrement apprécié dans l'analyse des tendances au niveau des industries plus sensibles au mouvements cycliques tel que les industries manufacturières et le commerce.

#### ***Politique de révision***

Sur une base mensuelle, les données préliminaires seront révisées le mois suivant. Par contre, la révision des données désaisonnalisées et non-désaisonnalisées se fera sur une base annuelle, c'est-à-dire avec la parution des données révisées du mois de décembre de l'année en cours. Afin de coïncider avec les révisions de juin de les divisions du Système canadien de comptabilité nationale de Statistique Canada, l'EERH se réserve une période ouverte de quatre ans.

A l'occasion, une révision historique devient nécessaire. Cela est dû aux nouvelles sources de données, une classification d'industries révisées et au changement à la base de sondage.

## **Products and Services**

This publication contains a selection of data available from the Survey of Employment, Payrolls and Hours.

A labour market consultant will be pleased to help you design your own table for your additional data requirements. Please call (613) 951-4090 or fax your request to (613) 951-4087.

Before the introduction of SEPH in 1983, three main sources were used to collect employment, earnings and hours data: the Employment, Payrolls and Manhours Survey(ES-1) (survey of large firms in commercial industries), the Employment Sample Survey (ES-2)(survey of small firms in commercial industries), and other employment surveys covering institutions and organizations in the non-commercial sector (GAP)(survey of education, health and welfare, and religious organizations). For more information on linking SEPH data with the ES-1 and ES-2, please contact our labour market consultants.

The data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). For further information on CANSIM call (613) 951-8200 or your nearest regional office.

## **References**

### **Confidentiality**

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected. An industry for a geography is deemed confidential if the number of respondents is small, or if only a few of the respondents are reporting a very large majority of the employment, while the majority of the respondents are reporting only a few employees each.

For detailed information on the methodology of SEPH, documents are available from the SEPH Dissemination Unit.

**Facsimile: (613) 951-4087**

## **Produits et services**

La présente publication contient une sélection de données disponibles de l'enquête sur l'emploi, la rémunération et les heures de travail.

Un conseiller en marché du travail se fera un plaisir de vous aider à créer votre propre tableau pour répondre à vos besoins additionnels en données. Veuillez téléphoner au (613) 951-4090 ou envoyer votre demande par télécopieur au (613) 951-4087.

Avant la réalisation de l'EERH en 1983, les données sur l'emploi, la rémunération et les heures de travail provenaient de trois grandes sources : l'enquête sur l'emploi, la rémunération et les heures-hommes (ES-1) (enquête auprès des grandes entreprises des branches d'activité commerciale), l'enquête-échantillon sur l'emploi (ES-2) (enquête auprès des petites entreprises des branches d'activité commerciale), et d'autres enquêtes sur l'emploi portant sur les établissements institutionnels et les organismes du secteur non commercial (GAP)(enquêtes menées auprès d'organismes religieux et dans les domaines de l'éducation, de la santé et du bien-être). Pour plus de renseignements sur le couplage des données de l'EERH et de celles de ES-1 et de ES-2, veuillez communiquer avec nos conseillers en marché du travail.

Les données qui paraissent dans la présente publication sont aussi disponibles sous forme ordiolingue dans CANSIM (Système canadien d'information socio-économique). Pour de plus amples renseignements sur CANSIM, veuillez téléphoner au (613) 951-8200 ou au bureau régional le plus près.

## **Référence**

### **Confidentialité**

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises. Une industrie, pour une géographie est considérée confidentielle si la quantité de répondants est petite ou si seulement quelques répondants représentent la majorité de l'emploi alors que la plus grande partie des répondants représentent seulement quelques employés chacun.

Des documents contenant des renseignements plus détaillés sur la méthodologie de l'EERH peuvent être obtenus en communiquant avec l'Unité de diffusion.

Please note that Statistics Canada has entered into data sharing agreements, pursuant to section 11 of the Statistics Act, with the statistical agencies in the provinces of British Columbia, Manitoba, Ontario, Quebec and New Brunswick and pursuant to Section 12 with the Executive Council of the Northwest Territories. Under Section 12 of the Statistics Act, you may refuse to share your information by writing to the Chief Statistician and returning your letter of objection along with the completed questionnaire in the enclosed return envelope.

Veuillez noter que Statistique Canada a conclu des accords de partage de données en vertu de l'article 11 de la Loi sur la statistique avec les agences statistiques des provinces suivantes: Colombie-Britannique, Manitoba, Ontario, Québec et Nouveau-Brunswick. En vertu de l'article 12 de la Loi sur la statistique, vous pouvez refuser de partager vos renseignements en communiquant votre décision par écrit au statisticien en chef et en retournant votre lettre avec le questionnaire rempli dans l'enveloppe de retour ci-jointe.

# Find out the inside story on 20% of the labour force

**U**ncovering the latest labour changes in the public sector can be tough. But now there's a publication to help.

*Public Sector Employment and Remuneration 1991/92, (With Historical Data from 1987)* gives you reliable data, consistent comparisons, and concise analysis on the changing levels of public sector employment.

This publication brings you all the facts! *Public Sector Employment and Remuneration 1991/92*

provides you with the most up-to-date

public sector employment statistics, including for the first time, FULL

COVERAGE OF THE PUBLIC SECTOR and new CENSUS METROPOLITAN AREA DATA for federal and local governments.

This valuable working tool will help you to:

- Chart changes in public sector employment: nationally, provincially and locally.
- Make direct comparisons between employment levels: federal, provincial, inter-provincial, and municipal.

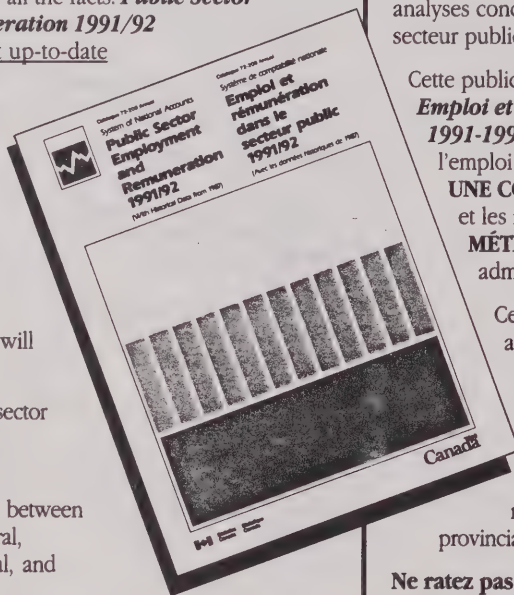

**Don't miss this opportunity** to get the information you need to understand where we are and make informed decisions about public sector employment strategies for the '90s.

*Order your copy of Public Sector Employment and Remuneration today!*

Each copy of *Public Sector Employment and Remuneration* (Catalogue no. 72-209) costs only \$39 in Canada (plus GST), US\$47 in the United States and US\$55 in other countries.

To order, write to **Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6**, or contact the nearest Statistics Canada Regional Office listed in this publication.

For faster ordering, call toll-free **1-800-267-6677** and use your VISA or MasterCard. Or **fax** your order to **(613) 951-1584**.

# Découvrez les faits réels qui touchent 20% de la population active

**I**l est parfois difficile de se tenir informé des derniers développements survenus dans le dossier de l'emploi. Heureusement, il existe maintenant une nouvelle publication pour combler cette lacune.

*Emploi et rémunération dans le secteur public en 1991-1992, (Avec les données historiques de 1987)* fournit des données fiables, des comparaisons pertinentes et des analyses concises sur l'évolution du niveau d'emploi dans le secteur public.

Cette publication est une source de données factuelles.

*Emploi et rémunération dans le secteur public en 1991-1992* vous offre les statistiques les plus récentes sur l'emploi dans le secteur public et, pour la première fois, UNE COUVERTURE COMPLÈTE DU SECTEUR PUBLIC et les nouvelles DONNÉES SUR LES RÉGIONS MÉTROPOLITAINES DE RECENSEMENT pour les administrations fédérale et locales.

Cet ouvrage de référence inestimable vous aidera à :

- représenter graphiquement l'emploi total dans le secteur public, à l'échelle nationale, provinciale et locale;
- établir des comparaisons directes entre les niveaux d'emploi dans les administrations fédérales, provinciales, interprovinciales et municipales.

**Ne ratez pas l'occasion** d'en savoir davantage sur la situation actuelle de l'emploi afin de pouvoir prendre des décisions éclairées sur les stratégies d'emploi à adopter pour le secteur public dans les années 1990.

*Commandez dès aujourd'hui votre exemplaire d'Emploi et rémunération dans le secteur public.*

*Emploi et rémunération dans le secteur public en 1991-1992* (n° 72-209 au Catalogue) est vendu seulement 39 \$ l'exemplaire au Canada (TPS en sus), 47 \$ US aux États-Unis et 55 \$ US dans les autres pays.

Pour commander, écrivez à : **Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6** ou communiquez avec le bureau régional de Statistique Canada le plus proche (la liste figure dans la présente publication).

Pour un service plus rapide, composez sans frais le **1-800-267-6677** et faites débiter votre carte VISA ou MasterCard. Il est aussi possible de passer votre commande par télécopieur au **(613) 951-1584**.

## Do you really have time to monitor over 200 Trusteed Pension Funds?

**Y**ou do – if you subscribe to **Quarterly Estimates of Trusteed Pension Funds**.

The only periodical of its kind in Canada, Quarterly Estimates surveys the 200 largest trusteed pension funds, which hold 85% of the assets of all trusteed funds. The result is detailed, aggregate estimates of the income, expenditure and assets of approximately 3,800 funds operating in Canada.

Each issue gives you:

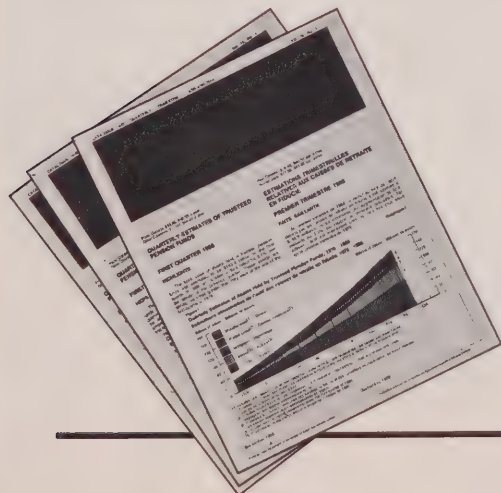

- current financial data for employee and employer contributions to the fund;
- investment income, profits and losses on sales of securities;
- pension payments and annuity purchases.

Distribution of investment portfolios among such vehicles as stocks, bonds, pooled funds and short term holdings is also highlighted. The accompanying analysis examines trends, growth and performance over time.

*Get the numbers.*

Subscribe to **Quarterly Estimates of Trusteed Pension Funds**, (Catalogue No. 74-001) for the regular update you need. A subscription to this quarterly is \$44 annually in Canada, US\$53 in the United States and US\$62 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

## Vous avez le temps de vous renseigner sur plus de 200 caisses de retraite en fiducie ?

**O**ui – si vous vous abonnez à **Estimations trimestrielles relatives aux caisses de retraite en fiducie**.

Ce périodique, unique en son genre au Canada, passe en revue la situation des 200 plus importantes caisses de retraite en fiducie, qui représentent 85 % de l'actif de l'ensemble des caisses de retraite. Le résultat prend la forme d'estimations détaillées et globales des recettes, des dépenses et de l'actif d'environ 3 800 caisses de retraite au Canada.

Chaque numéro vous présente :

- des données financières courantes relativement aux cotisations de l'employé et de l'employeur à la caisse de retraite;
- les revenus de placements ainsi que les profits et pertes sur les ventes de titres;
- les paiements des pensions et les achats de rentes.

Vous y trouverez également des renseignements sur la répartition des portefeuilles de placement entre les actions, les obligations, les fonds communs et les placements à court terme ainsi qu'une analyse des tendances, de la croissance et du rendement dans le temps.

*Abonnez-vous !*

La publication **Estimations trimestrielles relatives aux caisses de retraite en fiducie** (n° 74-001 au catalogue) vous permet d'obtenir régulièrement les données à jour dont vous avez besoin. L'abonnement à cette publication trimestrielle coûte 44 \$ par année au Canada, 53 \$ US aux États-Unis et 62 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

# 1-800-267-6677

# To those of you who need in-depth information about the labour market...

...Statistics Canada produces *Labour Force Annual Averages 1991* - a reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force*.

The *Labour Force Annual Averages 1991* covers:

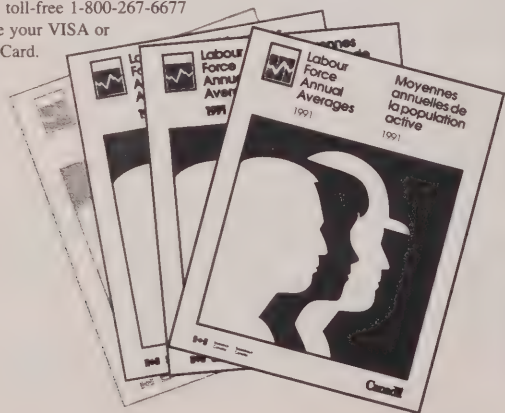

- an overview of changes that occurred in the service industries over the period 1976 to 1991;
- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by provinces;
- and more.

*Labour Force Annual Averages 1991*. Part and parcel of Statistics Canada's customer-driven approach to business information.

*Labour Force Annual Averages 1991* (catalogue number 71-220) is available for \$39 in Canada, US\$47 in the United States and US\$55 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list of centres appears in this publication.)

For faster service, FAX your order to 1-613-951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

# À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail...

...Statistique Canada présente *Moyennes annuelles de la population active 1991* - un document de référence créé spécialement à votre intention. Vous y trouverez des données détaillées, des sommaires et des graphiques faciles à consulter, des ventilations géographiques plus détaillées qu'auparavant et davantage de variables et de recoupements qu'il n'en paraît dans les numéros mensuels de *La population active*.

*Moyennes annuelles de la population active 1991* porte sur:

- un aperçu des changements qui sont survenus dans le secteur des services au cours de la période 1976 à 1991;
- les heures perdues et l'absentéisme, ventilés par secteur d'activité et province;
- l'emploi à plein temps et à temps partiel, ventilé par secteur d'activité et province;
- les professions dans les régions métropolitaines et les régions économiques;
- les secteurs d'activité dans les régions métropolitaines et les régions économiques;
- la participation au marché du travail et les obligations familiales selon la province;
- et bien d'autres.

*Moyennes annuelles de la population active 1991* est un pivot de l'approche de Statistique Canada qui vise à satisfaire les besoins de ses clients en matière d'information.

*Moyennes annuelles de la population active 1991* (numéro 71-220 au catalogue) : est offert à 39 \$ au Canada, 47 \$ US aux États-Unis et 55 \$ US dans les autres pays.

Pour commander, prière d'écrire à l'adresse suivante : Vente des publications, Statistique Canada, Ottawa (Ontario) K1A 0T6, ou communiquer avec le centre régional de consultation de Statistique Canada le plus proche (liste des centres incluse dans la présente publication).

Pour accélérer le service, commander par télécopieur au 1-613-951-1584, ou composer sans frais le 1-800-267-6677 et utiliser la carte VISA ou MasterCard.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM. Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Employment, Earnings and Hours,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-4090) or to the Statistics Canada reference centre in:

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressés à:

Emploi, gains et durée du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-4090) ou au centre de consultation de Statistique Canada à:

## Note of Appreciation

*Canada owes the success of its statistical system to  
a long-standing cooperation involving Statistics  
Canada, the citizens of Canada, its businesses and  
governments. Accurate and timely statistical  
information could not be produced without their  
continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose  
sur un partenariat bien établi entre Statistique Canada  
et la population, les entreprises et les administrations  
canadiennes. Sans cette collaboration et cette bonne  
volonté, il serait impossible de produire des statistiques  
précises et actuelles.*

---

## Notes

Data for the current month are preliminary estimates and are subject to revision in the next issue of this publication.

Data contained in this publication (unless otherwise specified) are not seasonally adjusted.

---

### Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

---

### Note on CANSIM

The data published in Employment, Earnings and Hours (Catalogue No. 72-002) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional centres at the numbers listed on the inside front cover of this publication, or contact CANSIM division, Statistics Canada, R.H. Coats Building, Ottawa, Ontario, K1A 0T6 (613) 951-8200

## Survey Overview

## Aperçu de l'enquête

---

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of payroll employment, paid hours and earnings. These measures are compiled at detailed industrial levels for Canada, the Provinces and Territories.

All employers in Canada, except those primarily concerned with agriculture, fishing and trapping, private household services, religious organizations and defence services, form the target population for the survey.

Conceptually, the SEPH reference period is the last seven days in any specified month, but the questionnaire asks respondents to report for the last pay period in the month.

The statistics contained in this report are based on information provided by firms of all sizes and in the case of government units, by Public Institutions Division in Statistics Canada.

Data are released for the two latest reference months. The preliminary month's estimates and the preceding revised month's estimates are based on response rates of approximately 80% and 90% respectively.

### DEFINITIONS

#### *Employee:*

Any person(s) drawing pay for services rendered or for paid absences, and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form.

#### *Average Earnings:*

Gross taxable payrolls divided by the number of employees on payrolls equals average earnings. Excluded from the payroll dollar amounts are taxable allowances and benefits, lump sum special payments, certain types of non-wage compensation as well as employer contributions to unemployment insurance, Canada/Quebec pension plans, provincial medical plans, worker's compensation and other welfare plans.

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances mensuelles de l'ensemble des salariés inscrits sur le registre de paye, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique pour le Canada les provinces et les territoires.

L'enquête vise tous les employeurs au Canada à l'exception de ceux dont l'activité principale est liée à l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

En théorie, la période de référence de l'EERH correspond aux sept derniers jours du mois de référence, mais les répondants doivent remplir le questionnaire en tenant compte de la dernière période de paye du mois.

Les statistiques contenues dans ce rapport sont basées sur des renseignements fournis par des entreprises de toutes tailles ainsi que par la Division des institutions publiques de Statistique Canada.

Les statistiques sont publiées sur les deux derniers mois de référence. Les estimations préliminaires du mois le plus récent et les estimations révisées du mois précédent sont basées sur des taux de réponse approximatifs de 80 % à 90 % respectivement.

### DÉFINITIONS

#### *Salarié:*

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada.

#### *Gains moyens:*

La masse salariale brute imposable divisée par le nombre de salariés inscrits sur la liste de paye est égale aux gains moyens. Sont exclus de la masse salariale, les indemnités imposables, les paiements forfaitaires spéciaux, certains genres de rémunération non salariale ainsi que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes de pension du Canada et du Québec, aux régimes d'assurance-maladie provinciaux, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance.

### **Average Hours:**

Average weekly hours are obtained by dividing the total weekly hours by the number of employees. Total paid hours are defined as all hours worked including overtime hours plus hours of paid absence.

### **Heures moyennes:**

Les heures hebdomadaires moyennes sont calculées en divisant le nombre total d'heures hebdomadaires par le nombre de salariés. Le nombre total d'heures rémunérées est défini comme étant toutes les heures travaillées y compris les heures supplémentaires et les heures d'absence payées.

*There are differences between SEPH and other related employment and compensation measures. A summary of these differences and a more detailed description of the SEPH survey is located in the Concepts and Methods Section (Annex 1).*

*Certaines mesures de l'emploi et de la rémunération, souvent comparées aux données de l'EERH, présentent des différences entre elles. Un résumé de ces différences et une description plus détaillée de l'enquête sur l'EERH figurent dans la section sur les Concepts et les méthodes (annexe 1).*

## Faits Saillants

Après désaisonnalisation, l'ensemble des salariés inscrits sur la liste de paye pour l'ensemble des industries s'élève à 9,949,000 en décembre, soit une deuxième augmentation en autant de mois. La rémunération hebdomadaire moyenne a progressé de 3.2% en 1992, en baisse par rapport au gain de 4.3% enregistré en 1991.

# Highlights

# Faits saillants

## Preliminary Estimates of December 1992, Seasonally adjusted

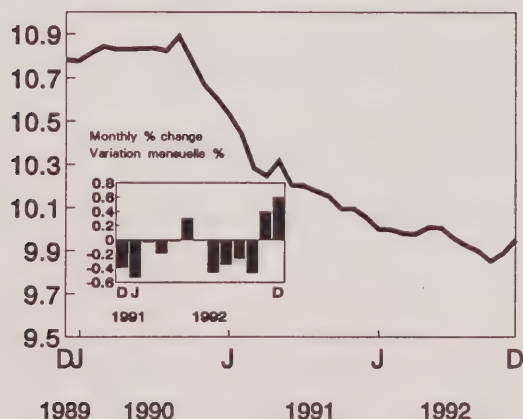

- Payroll employment for December was estimated at 9,949,000, the second consecutive monthly increase following five months of decline. The decline in annual average industrial aggregate<sup>1</sup> payroll employment was smaller in 1992 (-280,000) than in 1991 (-561,000).
- Increases in payroll employment in December were concentrated in the service-producing industries, with the exception of health and social services and public administration.
- Seasonally adjusted average weekly earnings<sup>2</sup> were \$557.89 in December, an increase of 3.2% from December 1991. The growth rate in earnings during 1992 was lower than in previous years.
- For the ninth consecutive month, industrial aggregate average weekly hours for hourly paid employees remained unchanged at 30.5 hours.

## Estimations préliminaires du mois de Décembre 1992, Données désaisonnalisées

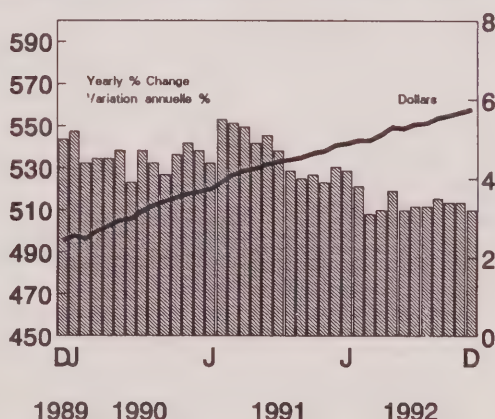

- Le nombre de salariés inscrits sur la liste de paye en décembre a été estimé à 9,949,000 ce qui représente une deuxième hausse mensuelle d'affilée après cinq mois de recul. La diminution annuelle moyenne des salariés inscrits sur la liste de paye pour l'ensemble des industries<sup>1</sup> en 1992 (-280,000 salariés) a été moindre qu'en 1991 (-561,000).
- L'augmentation des salariés inscrits sur la liste de paye, en décembre a surtout été observée dans la branche productrice de services, à l'exception des services de santé et des services sociaux et de l'administration publique.
- La rémunération hebdomadaire moyenne<sup>2</sup> désaisonnalisée s'établissait à \$557.89 en décembre 1992, une hausse de 3.2% par rapport à décembre 1991. La croissance de la rémunération en 1992 est inférieure à ce qu'elle a été les années précédentes.
- Le nombre moyen d'heures hebdomadaires des salariés rémunérés à l'heure pour l'ensemble des industries n'a pas changé depuis neuf mois, s'établissant toujours à 30.5.

### SEPH Average Weekly Earnings, Seasonally Adjusted / Rémunération hebdomadaire moyenne de l'EERH, désaisonnalisée. December 1992 / Décembre 1992

## Unadjusted Data

- Unadjusted payroll employment was 9,805,000 a year-over-year decline of -1.0%. Despite the decline in total payroll employment in December, 42% of all industries reported employment gains. A year earlier, only 24% of industries reported similar gains.

- Firms with less than 200 employees recorded a year-over-year employment decline of -0.3%, a significant improvement from the previous month, whereas firms with more than 200 employees reported a drop of -1.5%.

- The fixed-weighted average hourly earnings index for hourly paid employees rose 3.2% from December 1991, the smallest increase in 1992.

- Within manufacturing and finance, insurance and real estate, a shift occurred in total paid hours towards higher paying industries. This led to lower year-over-year growth rates for fixed-weighted average hourly earnings compared to the current average hourly earnings series.

## Données non désaisonnalisées

- Le nombre de salariés inscrits sur la liste de paye (non désaisonnalisées) était 9,805,000 soit une diminution de -1.0% par rapport à l'année précédente. Malgré la diminution d'une année à l'autre du nombre de salariés inscrits sur la liste de paye en décembre, l'emploi a progressé dans 42% des industries. L'année précédente, seulement 24% des industries ont connu une croissance semblable.

- L'emploi dans les entreprises de moins de 200 salariés a baissé de -0.3% d'une année à l'autre, ce qui est nettement mieux que le résultat du mois précédent, alors qu'il a reculé de -1.5% dans les entreprises de plus de 200 salariés.

- L'indice à pondération fixe de la rémunération horaire moyenne des salariés rémunérés à l'heure a augmenté de 3.2% par rapport à décembre 1991, soit la plus faible augmentation de 1992.

- À l'intérieur des manufactures, des finances, assurances et affaires immobilières, un changement s'est produit dans le total des heures de travail parmi les industries les plus rémunératrices. Ceci a causé la baisse annuelle du taux de croissance de la rémunération horaire moyenne à pondération fixe, comparativement à la rémunération horaire moyenne variable.

---

<sup>1</sup>The industrial aggregate is the sum of all industries with the exception of agriculture, fishing and trapping, religious organizations, private households and military personnel.

<sup>2</sup>Not adjusted for inflation.

---

<sup>1</sup>L'ensemble des industries est la somme de toutes les industries à l'exception de l'agriculture, la pêche et le piégeage, les organismes religieux, les ménages privés et les services de défense.

<sup>2</sup>Non ajustée pour l'inflation.

---

Employment in the province of Quebec stood at 2,331,500 in December 1992. While this represented a drop of -2.2% compared with the same month a year earlier, it was an improvement over the employment declines recorded during the past two years. This is the smallest year-over-year decline since January 1991.

En décembre 1992, l'emploi au Québec était de 2,331,500. Ceci représente une diminution de -2.2% par rapport au même mois de l'année précédente et une baisse moins progressive durant les deux dernières années. C'est aussi la plus faible diminution depuis janvier 1991.

Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires.

## Table 2

## Tableau 2

**Estimates of Average Weekly Earnings, for All Employees, Seasonally Adjusted and Unadjusted, Firms of All Sizes, for Selected Industries, Canada, Provinces and Territories, (1988-1992).**

**Estimations désaisonnalisées et non désaisonnalisées de la rémunération hebdomadaire moyenne, pour l'ensemble des salariés, entreprises de toutes les tailles, pour une sélection d'industries, Canada, provinces et territoires, (1988-1992).**

In December 1992, the seasonally adjusted Canada estimate of average weekly earnings for service producing industries, grew by 3.7% over December 1991 while goods producing industries rose by 2.4% during the same period. These earnings increases were less than in December 1991 when growth was recorded at 4.8% for goods producing industries and 4.5% for service producing industries.

En décembre 1992, la rémunération hebdomadaire moyenne désaisonnée au Canada enregistrait une augmentation de 3.7% pour la branche productrice de services, comparativement à décembre 1991 et de 2.4% pour la branche productrice de biens pour la même période. L'augmentation des gains était plus faible qu'en décembre 1991 où l'on enregistrait pour la branche productrice de biens 4.8% et 4.5% pour la branche productrice de services

Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires.

---

## Table 3

---

**Fixed-weighted Indexes of Average Hourly Earnings, for All Employees, Firms of All Sizes, for Selected Industries, Canada, Provinces and Territories, (1986 = 100), (1988-1992).**

In December 1992, among the provinces, New Brunswick had the highest yearly increase for the fixed-weighted average hourly earnings index. It has increased 5.8% since December 1991. This compares with an increase of 2.9% for all of Canada.

---

## Tableau 3

---

**Indices à pondération fixe de la rémunération horaire moyenne, pour l'ensemble des salariés, entreprises de toutes les tailles, pour une sélection d'industries, Canada, provinces et territoires, (1986 = 100), (1988-1992).**

En décembre 1992, parmi les provinces, le Nouveau-Brunswick a marqué la plus forte augmentation pour l'indice à pondération fixe de la rémunération horaire moyenne. Ceci représente une augmentation de 5.8% depuis décembre 1991. Le Canada affiche une augmentation de 2.9% pour la même période.

## Table 4

**Diffusion Index of Employment, for All Employees, Firms of All Sizes, for Selected Industries, Canada.**

The number of industries in the Industrial Aggregate which have recorded year-over-year employment growth has shown little change since March 1992. The employment diffusion index for Canada in December was 0.42. The employment diffusion index for durable goods stood at 0.40, a decrease of 0.07 from the previous month. The decrease was led by Motor Vehicle Parts and Accessories.

---

## Tableau 4

**Indices de diffusion de l'emploi, pour l'ensemble des salariés, entreprises de toutes les tailles, pour une sélection d'industries, Canada.**

Depuis mars 1992, le nombre d'industries comprises dans l'ensemble des industries démontre peu de changement dans la croissance d'emploi par rapport à l'année précédente. L'indice de diffusion de l'emploi au Canada en décembre était 0.42. Les biens durables étaient à 0.40, une diminution de 0.07 par rapport au mois précédent. L'industrie pièces et accessoires pour véhicules automobiles menait cette baisse.

**Diffusion Index of Average Weekly Hours, Employees paid by the Hour, Firms of All Sizes, for Selected Industries, Canada.**

**Indices de diffusion des heures hebdomadaires moyennes, des salariés rémunérés à l'heure, entreprises de toutes les tailles, pour une sélection d'industries, Canada.**

---

Average weekly hours diffusion index for Wholesale Trade was 0.43 in December 1992, a decrease of -0.14 from the previous month. This decline was led by Other Machinery Equipment and Supplies and Other Wholesale Products.

En décembre 1992, l'indice de diffusion des heures hebdomadaires moyennes pour l'industrie du commerce de gros s'établissait à 0.43 soit une baisse de -0.14 par rapport au mois précédent. Les industries autres machines, matériel et fournitures ainsi que les produits divers des commerces de gros sont en majorité responsables de cette baisse.

## Table 6

## Tableau 6

---

Annual Estimates of Employment and Average Weekly Earnings, for All Employees, Firms of All Sizes, Industrial Aggregate, Historical Series, (1983-1992), Canada, Provinces and Territories.

Estimations annuelles de l'emploi et de la rémunération hebdomadaire moyenne, pour l'ensemble des salariés, entreprises de toutes les tailles, pour l'ensemble des industries, données historiques, (1983-1992), Canada, provinces et territoires.

---

Employment in the province of New Brunswick decreased -1.9% from 1990 to 1991. This was the lowest decline of all the provinces during the same period.

De 1990 à 1991, l'emploi au Nouveau-Brunswick a diminué de -1.9%. Ceci représente la plus faible baisse par rapport aux autres provinces.

Les concepts et méthodes sont décrits à la fin de la présente publication.  
Les données pour le mois courant sont préliminaires.

## Table 7

## Tableau 7

### Estimates of Employment, Firms of All Sizes, by Industry, Canada, Provinces and Territories.

In December 1992, Health and Social Services Industries represented 11.4% of the total Industrial Aggregate employment while Educational and Related Services comprised 9.4%. These two industries combined accounted for 2,038,200 employees across Canada.

### Estimations de l'emploi, entreprises de toutes les tailles, par industrie, Canada, provinces et territoires.

En décembre 1992, la portion de l'emploi représentée par l'industrie de la santé et des services sociaux était de 11.4% et de 9.4% pour l'éducation et services connexes par rapport à l'ensemble des industries. Ces deux portions sont équivalentes à 2,038,200 salariés au Canada.

## Table 8

## Tableau 8

**Estimates of Earnings and Hours,  
Firms of All Sizes, by Industry,  
Canada, Provinces and Territories.**

**Estimations de la rémunération et des  
heures moyennes, entreprises de  
toutes les tailles, par industrie,  
Canada, provinces et territoires.**

Average weekly earnings for Finance, Insurance and Real Estate were estimated at \$614.48, up 8.8% from December 1991. Real Estate Operators and Insurance Agencies contributed to the strength with an annual increase of 12.6%. Over the same time period, while earnings rose, employment in Real Estate Operators and Insurance Agencies fell -6.8%.

La rémunération hebdomadaire moyenne pour l'industrie des finances, assurances et affaires immobilières s'établissait à \$614.48, une augmentation de 8.8% depuis décembre 1991. Les services immobiliers et agences d'assurances ont contribué à la hausse avec une croissance annuelle de 12.6%. Malgré une augmentation des gains pour les services immobiliers et agences d'assurances, l'emploi a chuté de -6.8% durant la même période.

## Tableau 9

---

**Estimates of Employment and Earnings, by Firm Size, for Selected Industries, Canada and Provinces.**

**Estimations de l'emploi et de la rémunération, selon la taille de l'entreprise, pour une sélection d'industries, Canada et les provinces.**

---

Trade was the only industry where the average weekly earnings of small firms (firms with less than 200 employees) were greater than the average weekly earnings for those employed in large firms (firms with 200 employees or more). However, survey estimates indicate that hourly paid employees in small firms work more hours but receive lower average hourly earnings.

Dans l'industrie du commerce, la rémunération hebdomadaire moyenne pour les entreprises de moins de 200 employés était plus élevée que celle des entreprises de 200 employés ou plus. L'enquête démontre que dans les petites entreprises, les salariés rémunérés à l'heure travaillent un plus grand nombre d'heures pour un taux horaire moindre.

## Concepts and Methods

---

### Objectives

The Survey of Employment, Payrolls and Hours (SEPH) is primarily designed to provide monthly estimates of the total number of employees on payrolls, average weekly and hourly earnings and average weekly hours for Canada, provinces and territories at detailed industry levels.

### Target Population

The target population is all employers in Canada except those primarily concerned with agriculture, fishing and trapping, private household services, religious organizations and defence services. SEPH draws its sample from the Business Register maintained by the Business Register Division of Statistics Canada.

### Data Sources

The statistics contained in this report are based on information obtained from employers of firms of all sizes and from the Public Institutions Division in Statistics Canada. All information except that related to employment and payroll statistics for the government units (federal, provincial and local levels of government) are provided by firms.

### Data Collection

SEPH has four methods of data collection. Questionnaires are mailed out each month to the payroll office of employers. Telephone interviews are used for respondents who express a preference for being surveyed by telephone. Computer printouts are supplied by those respondents who prefer to report their data through their computerized payroll system. SEPH, via an exchange of data arrangement between the Labour and Public Institutions Divisions of Statistics Canada, is supplied with government units records providing general government services which are under the collection responsibility of the Public Institutions Division.

### Reference Period

The SEPH reference period is the last seven days in any specified month, but the questionnaire asks respondents to report for the last pay period in the month. When the reported pay period is longer than

## Concepts et méthodes

---

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail (EERH) sert principalement à fournir des estimations mensuelles du nombre total de salariés inscrits sur les listes de paye, des gains hebdomadaires et horaires moyens, et des heures hebdomadaires moyennes pour le Canada, les provinces et les territoires à des niveaux détaillés selon l'activité économique.

### Population cible

La population cible comprend tous les employeurs du Canada, sauf ceux dont les activités relèvent principalement des secteurs de l'agriculture, de la pêche et du piégeage, des services domestiques, des organismes religieux et des services de la défense. L'échantillon de l'EERH est établi à partir du registre des entreprises qui est tenu à jour par la Division du registre des entreprises de Statistique Canada.

### Sources des données

Les statistiques contenues dans le présent bulletin sont fondées sur des renseignements recueillis auprès des employeurs d'entreprises de toutes tailles et de la Division des institutions publiques de Statistique Canada. Tous les renseignements sauf ceux qui ont trait à l'emploi et à la rémunération dans les unités des administrations publiques (aux niveaux fédéral, provincial et local) sont fournis par les entreprises.

### Collecte des données

Quatre méthodes sont utilisées pour la collecte des données de l'EERH. Chaque mois, des questionnaires sont envoyés par la poste au service de paye des entreprises. Les répondants qui le désirent peuvent être interviewés par téléphone. D'autres choisissent de transmettre leurs données au moyen de leur système automatisé d'administration de la paye. Dans le cadre d'une entente d'échange de données conclue entre la Division du travail et la Division des institutions publiques de Statistique Canada, les données de l'EERH relatives au fichier d'unités d'administration publiques qui assurent des services gouvernementaux généraux sont fournies par la Division des institutions publiques qui est chargée d'en faire la collecte.

### Période de référence

La période de référence de l'EERH correspond aux sept derniers jours d'un mois donné, mais les renseignements que les répondants doivent indiquer sur le questionnaire portent sur la dernière période de paye du mois. Lorsque la période de

one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. Reference week adjustments are also made for strikes/lockouts and layoffs.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by questionnaires mailed monthly to a sample of about 56,000 establishments selected out of a universe of about 800,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

## Terms and Definitions

**Establishment:** For statistical purposes it is the smallest entity capable of reporting statistics of economic production, typically a factory, mine, store or similar unit.

**Firm:** A firm is any business or institution whether incorporated or not; it comprises sole proprietorships, partnerships, companies and other forms of organizations.

**Industry classifications:** On the basis of its principal activity, each establishment is assigned an industry code according to the 1980 Standard Industrial Classification. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. SEPH has 281 industry groups in scope. For analytical purposes, we have created special groupings which are not part of the Standard Industrial Classification.

- a) Industrial aggregate (041- 999) represents the sum of all the industries included in the survey.
- b) Goods-producing industries (041-449)(491-499) comprise forestry, mining, manufacturing, construction and other utilities.
- c) Service-producing industries (451-484)(501-999) consists of transportation, communication and storage, trade, finance and insurance, services (except religious organizations and private households) and public administration (except for military personnel, and other government services)

paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye visée. Des rajustements sont faits aussi pour tenir compte des grèves, lock-out et mises à pied survenant durant la semaine de référence.

## Méthodologie

Les statistiques contenues dans la présente publication sont fondées sur les résultats d'une enquête effectuée par sondage menée auprès d'unités déclarantes. Les données sont recueillies par questionnaires envoyés par la poste tous les mois à un échantillon d'environ 56,000 établissements prélevés d'un univers d'environ 800,000 unités. L'échantillon représente toutes les activités économiques que vise l'enquête, toutes les provinces et tous les territoires, ainsi que toutes les tailles d'unités. Chaque mois, l'univers et l'échantillon font l'objet d'une mise à jour pour tenir compte des créations et des disparitions.

## Termes et définitions

**Établissement:** À des fins statistiques, l'établissement est la plus petite unité pouvant fournir des données sur la production économique. En général, une usine, une mine, un magasin ou à une unité semblable.

**Entreprise:** Toute entreprise commerciale ou institution, constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une association, d'une société ou d'une autre forme d'organisation.

**Classement par activité économique:** Un code d'activité économique tiré de la Classification type des industries de 1980 est attribué à chaque établissement selon sa principale activité. Les industries et les différents groupes industriels sont décrits dans le manuel "Classification Types des Industries 1980" catalogue 12-501. Dans les tableaux de cette publication une colonne est indentée "CTI 1980" ces codes correspondent à ce manuel. On compte 281 groupes d'activités visées par l'EERH. À des fins analytiques, nous avons créé des groupes spéciaux qui ne figurent pas dans la Classification type des industries.

- a) Ensemble des industries (041-999) - Représente la somme de toutes les diverses activités économiques visées par l'enquête
- b) Branches productrices de biens (041-449)(491-499) - Comprend les forêts, les mines, les manufactures, la construction et autres services publics
- c) Branches productrices de services (451-484)(501-999) - Englobe les transports, les communications et l'entreposage, le commerce, les finances et les assurances, les services (sauf les organismes religieux et les ménages privés) et l'administration publique (excepté le personnel militaire et autres services gouvernementaux)

- d) Durable goods manufacturing includes wood industries (251-259), furniture and fixtures (261-269), primary metal industries (291-299), fabricated metal products (301-309), machinery industries (311-319), transportation equipment (321-329), electrical and electronic products (331-339) and non-metallic mineral products (351-359)
- e) Non-durable manufacturing is the sum of food industries (101-109), beverage industries (111-114), tobacco industries (121-122), rubber products (151-159), plastic products (161-169), leather products (171), primary textile industries (181-183), textile product industries (191-199), clothing industries (243-249), paper and allied products industries (271-279), printing, publishing and allied industries (281-284), refined petroleum and coal products (361-369), chemical and chemical products (371-379) and other manufacturing industries (391-399)
- f) Commercial services is the sum of business service industries (771-779), accommodation service industries (911-914), food and beverage service industries (921-922), amusement and recreational service industries (961-969), personal service industries (971-979), membership organization industries (982-986) and other service industries (991-999)
- g) Non-commercial services is the sum of educational and related service industries (851-859) and health and social service industries (861-869)
- h) Banks (700) comprises the Central Bank (701) and Chartered Banks and other banking-type intermediaries (702)
- i) Other amusement and recreational services (960) consists of commercial spectator sports (964), gambling operations (966) and other amusement and recreational services (969)
- j) Public Administration (812-837) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level
- d) Fabrication de biens durables - Comprend les industries : du bois (251-259), de meuble et des articles d'ameublement (261-269), de première transformation des métaux (291-299), de fabrication des produits métalliques (301-309), de machinerie (311-319), du matériel de transport (321-329), des produits électriques et électroniques (331-339) et les industries des produits minéraux non métalliques (351-359)
- e) Fabrication de biens non durables - Englobe les industries: des aliments (101-109), de la boisson (111-114), les industries du tabac (121-122), des produits en caoutchouc (151-159), des produits en matière plastique (161-169), du cuir (171), de la première transformation du textile (181-183), des industries des produits textiles (191-199), de l'habillement (243-249), du papier et produits connexes (271-279), de l'imprimerie, édition et industries connexes (281-284), des produits raffinés du pétrole et du charbon (361-369), des produits chimiques (371-379) et les autres industries manufacturières (391-399)
- f) Services commerciaux - englobe les industries: des services aux entreprises (771-779), industries de l'hébergement (911-914), industries de la restauration (921-922), industries de services de divertissements et loisirs (961-969), industries des services personnels (971-979), associations commerciales (982-986) et autres industries de services (991-999)
- g) Services non-commerciaux comprend les industries: des services d'enseignement et services annexes (851-859) et les industries des services de soins et services sociaux (861-869)
- h) Banques (700) - Comprend la banque centrale (701) et les banques à charte et autres intermédiaires de type bancaire (702)
- i) Services de divertissements et de loisirs (960) - Il s'agit des sports commerciaux (964), des loteries et jeux de hasard (966) et d'autres services de divertissement et de loisir (969)
- j) Administration publique (812-837) - Comprend seulement les établissements dont les activités ont un caractère essentiellement gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics

**Geographic classification:** Reporting units are assigned to a province or territory. The statistics contained in this report are based on the 1986 version of the Standard Geographic Classification.

**Classement géographique :** On attribue les unités déclarantes à une province ou à un territoire. Les statistiques contenues dans le présent document sont fondées sur la Classification géographique type de 1986.

**Paid absence:** Paid absence includes paid holidays, sick leave including industrial injury and personal leave such as bereavement leave, jury duty etc.

**Standard work week:** The hours in the standard work week constitute the average number of hours of work normally scheduled in a work week.

**Take all units:** Take all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. Included are all firms or organizations with 200 or more employees, units of government departments, crown corporations, combined companies and combined establishments.

**Take some units:** All other firms in the universe which have a known probability of selection are take some units.

### **Employee**

All persons drawing pay for services rendered or for paid absences and for whom the employer must complete a Revenue Canada T-4 Supplementary Form constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self employed, unpaid family workers, persons working outside Canada, military personnel, and casual workers for whom a T-4 is not required. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

- a) **Employees paid by the hour:** any employee whose basic wage is expressed as an hourly rate

**Congés payés :** Les congés payés comprennent les jours fériés payés, des vacances, des congés de maladie ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire ext.

**Semaine normale de travail :** Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement déterminées pour une semaine.

**Unités à tirage complet :** Les unités à tirage complet sont des unités déclarantes d'entreprises ou d'organisations qui font partie tous les mois de l'échantillon de l'enquête. Elles comprennent toutes les entreprises ou organisations de 200 salariés ou plus, les unités des services gouvernementaux, les sociétés de la couronne, les sociétés combinées et les établissements combinés.

**Unités à tirage partiel :** Toutes les autres entreprises qui ont une probabilité connue d'être choisies dans l'échantillon de l'enquête sont des unités à tirage partiel.

### **Salarié**

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada est un salarié.

Le terme "salarié" désigne les salariés à plein temps et à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, administrateurs, associés et autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les personnes travaillant à l'extérieur du Canada et le personnel militaire et pour les employés occasionnels dont l'employeur n'est pas tenu de remplir la formule T4. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (c.-à-d. les personnes en grève, en congé non payé, les personnes recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'un régime analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie sont quand même considérés comme des salariés.

Les salariés sont classés dans les catégories suivantes :

- a) **Salariés rémunérés à l'heure:** tout salarié dont la rémunération de base est calculée selon un taux horaire.

With the exception of the Elementary and Secondary Education (851), Post Secondary (852) and University education (853) industries this category of employment represents **non-teaching Staff**: all employees other than teachers and academic staff i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)

- b) **Salaried employees**: any employee whose basic remuneration is a fixed amount for at least one week.

With the exception of the Elementary and Secondary Education (851), Post Secondary (852) and University education (853) industries this category of employment represents **Teaching Staff**: those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

- c) **Other employees**: those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.

With the exception of the Elementary and Secondary Education (851), Post Secondary (852) and University education (853) industries this category of employment represents **Supply or Substitute Teachers**: teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

## Earnings

**Payrolls**: excludes dollar amounts that are taxable allowances and benefits, certain types of non-wage compensation as well as employer contributions to unemployment insurance, Canada/Quebec pension plans, provincial medical plans, workers compensation and other welfare plans. Annual special payments are excluded while other lump sum special payments are adjusted to coincide with the reference week period.

**Overtime pay**: includes all pay received for the number of hours worked in excess of the standard work-day or work-week.

**Average weekly earnings (including overtime)**: represent gross taxable payrolls divided by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the

Sauf pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853) cette catégorie d'emploi représente le **personnel non enseignant**: tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économe, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.

- b) **Employés**: tout salarié dont la rémunération de base constitue une somme fixe versée pour au moins une semaine.

Sauf pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853) cette catégorie d'emploi représente le **personnel enseignant**: tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

- c) **Autres salariés**: tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de millage, etc.

Sauf pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853) cette catégorie d'emploi représente le personnel **suppléants ou remplaçants**: enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

## Gains

**Rémunération**: ne comprend pas les montants en dollars qui représentent des allocations et des avantages imposables, certains types d'indemnités non salariales ainsi que les cotisations patronales à l'assurance-chômage, au régime de pension du Canada ou au Régime des rentes du Québec, aux régimes d'assurance-maladie provinciaux, aux caisses d'indemnisation des accidents du travail et à d'autres régimes de prévoyance. Les paiements annuels spéciaux sont exclus tandis que les paiements forfaitaire spéciaux sont rajustés de façon à coïncider avec la semaine de référence.

**Rémunération du temps supplémentaire**: ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

**Gains hebdomadaires moyens (incluant le temps supplémentaire)**: rémunérations brutes imposables divisées par le nombre de salariés. Les heures hebdomadaires moyennes (y compris les heures supplémentaires) sont déterminées en

salaried employees and for the other types of employees.

**Average weekly overtime earnings:** is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

**Average hourly overtime earnings:** is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

**Average hourly earnings (including overtime):** is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). Average hourly earnings is calculated for the hourly-rated employees and for the salaried employees.

**Average hourly overtime earnings:** is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

**Average weekly earnings (excluding overtime):** is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

## Hours

**Average weekly overtime hours:** is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

- a) **Total hours paid:** all hours worked, including overtime hours, plus hours of paid absence (e.g. holidays, sick leave, jury duty, etc.)
- b) **Overtime hours:** the total hours for which overtime was paid. These represent the hours worked.

divisant le total des heures hebdomadaires par le nombre de salariés. Ces données sont calculées à l'égard des salariés rémunérés à l'heure et des employés.

**Gains hebdomadaires moyens du temps supplémentaire:** ces gains sont obtenus en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre de salariés. Ils sont calculés à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

**Gains horaires moyens du temps supplémentaire:** gains calculés pour les employés rémunérés à l'heure en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

**Gains horaires moyens (incluant le temps supplémentaire):** ces gains sont obtenus en divisant les rémunérations hebdomadaires totales par le total hebdomadaire des heures travaillées (le total des heures hebdomadaires est celui qui est déclaré pour les salariés rémunérés à l'heure; pour les employés, les gains sont établis en multipliant la moyenne des heures travaillées pendant la semaine normale de travail par le nombre d'employés). Les gains horaires moyens sont calculés à l'égard des salariés rémunérés à l'heure et des employés.

**Gains horaires moyens du temps supplémentaire:** gains calculés pour les employés rémunérés à l'heure en divisant les rémunérations hebdomadaires du temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

**Gains hebdomadaires moyens (excluant le temps supplémentaire):** ces gains sont déterminés en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires du temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure et des employés.

## Heures

**Heures supplémentaires hebdomadaires moyennes:** ces heures sont obtenues en divisant le total hebdomadaire des heures supplémentaires par le nombre de salariés. Cette moyenne est calculée pour les employés rémunérés à l'heure.

- a) **Nombre total d'heures rémunérées :** ensemble des heures travaillées, y compris les heures supplémentaires, plus les heures de congé payé (par ex., les jours fériés, les congés de maladie, les congés pour fonctions judiciaires, etc.).
- b) **Heures supplémentaires :** total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

## **Sample Design**

### ***Survey Frame***

SEPH integrated to the new Business Register beginning with the October 1990 data reference month. The new Business Register is a complete list of all Canadian business entities engaged in economic activity. The objectives of the new BR are to improve coverage of the business universe, achieve greater consistency and comparability among the business surveys and to reduce respondent burden for smaller firms.

The BR consists of the integrated portion (IP) of larger units which are updated regularly through survey feedback, profiling and administrative sources. The non-integrated portion (NIP) comprises smaller payroll deduction records and are updated essentially from administrative sources.

### ***Stratification***

For the purpose of the sample selection and for the determination of the survey sample size, the universe of reporting units is stratified into 12 provinces and territories, 16 industry divisions and 4 sizes. (An industry division is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees. The universe of reporting units is further stratified into take-all and take-some categories. The total sample size of SEPH is governed by the objective of a 3.00% coefficient of variation for the estimate of employment at the province by industry division level.

### ***Sample Allocation and Selection***

The size of the take-some for the survey has been determined in order to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. Sampling fractions are computed for all cross-classifications of 3 digit SICs, province and size groups. To minimize the sample size, the sample allocation is such that the largest units are the most likely to be selected. However, the sampling fractions cannot be smaller than 0.01. A systematic sample is drawn for every 3 digit industry, province and size group. If the population count is less than 4 at the 3 digit SIC by province by size level, then the sampling fraction is disregarded and all the units are selected. The total sample size is the sum of the number of take-all and selected take-some units.

## **Modèle de l'échantillon**

### ***Base de sondage***

On a commencé à utiliser le nouveau registre des entreprises pour réaliser l'EERH à compter du mois de référence d'octobre 1990. Le nouveau registre des entreprises est une liste complète de toutes les entités commerciales canadiennes engagées dans une activité économique. Le RE a pour objet d'améliorer la couverture de l'univers des entreprises ainsi que la cohérence et la comparabilité des données des enquêtes-entreprises, et de réduire le fardeau de réponse des entreprises de plus petite taille.

Le RE comprend la partie intégrée des données sont les unités plus importantes qui sont mises à jour de façon régulière à l'aide des résultats obtenus au moyen d'enquêtes, d'établissement de profils et de sources administratives. La partie non-intégrée comprend les plus petites retenues sur les gains brute qui sont mis à jour principalement à partir de sources administratives.

### ***Stratification***

Pour les besoins de l'enquête on détermine la composition de l'échantillon et la taille en stratifiant l'univers des unités déclarantes est stratifié en 12 provinces et territoires, 16 branches d'activité et 4 catégories de taille. (Une branche d'activité est légèrement plus détaillée qu'une activité qui correspond à un code à un chiffre.) La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre catégories de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus. En outre, l'univers des unités déclarantes est stratifié en deux groupes : les unités à tirage complet et les unités à tirage partiel. La taille de l'échantillon global de l'EERH est déterminée en tenant compte du fait que l'on vise un coefficient de variation de 3.00% pour l'estimation de l'emploi au niveau de la province et de la division en fonction des activités.

### ***Répartition et choix de l'échantillon***

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau de la branche d'activité et de la province. Des fractions de sondage sont calculées pour tous les classements recoupés au niveau des codes à trois chiffres de la CTI, de la province et par groupe de tailles. Pour minimiser la taille de l'échantillon, l'échantillon est réparti de façon que les unités les plus importantes sont les plus susceptibles d'être choisies. Les fractions de sondage ne peuvent toutefois pas être inférieures à 0.01. Un échantillon systématique est tiré pour chaque combinaison de la CTI niveau des codes à trois chiffres, de la province et de la taille. S'il y a moins de 4 unités au niveau des codes de la CTI à 3 chiffres selon la province et par groupe de tailles, on ne tient pas compte de la fraction de sondage et toutes les unités sont choisies. La taille de l'échantillon est la somme du nombre d'unités à tirage complet et de certaines unités à tirage partiel.

## **Sample Rotation**

Generally speaking, after 12 months, in-sample units are replaced, and are not eligible for reselection for at least 12 months. Hence, approximately 1/12 of the take-some sample is replaced every month. Some units have to stay more than 12 months in sample due to the lack of replacement units at the 3 digit industry, province and size group level.

## **Reliability**

Reliability of the estimates can be assessed by examining sampling errors and by controlling non-sampling errors. These are two types of errors possible in estimates based on a sample survey.

*Sampling errors* occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. The difference with respect to a particular estimate is called the sampling error of the estimate.

*Non-sampling errors* are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the question, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. Efforts to reduce non-sampling errors include careful design of questionnaires, editing of data follow-up of and imputation for non-respondents and thorough control of processing operation. The SEPH program has a head-office Quality Assurance unit that is mandated to reduce non-sampling errors and ensure that concepts and definitions are respected.

## **Indicators of Sampling Errors**

The true sampling error is not known, however, it can be estimated from the sample itself by using a statistical measure called the standard error of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation. Tables of indicators of the coefficients of variation are available on request along with an explanatory note on how to use them to judge the quality of the estimates contained in this publication.

## **Rotation de l'échantillon**

De façon générale, après 12 mois, les unités échantillonnées sont remplacées, et ne peuvent pas être choisies de nouveau avant au moins 12 mois. Par conséquent, le un douzième environ des unités à tirage partiel de l'échantillon est remplacé chaque mois. Il peut arriver que des unités doivent demeurer plus de 12 mois dans l'échantillon à cause du manque d'unités de remplacement au groupe codes d'activités à trois chiffres à la province, à la taille.

## **Fiabilité des estimations**

La fiabilité des estimations est fondées en examinant l'erreur d'échantillonnage et en contrôlant les erreurs non due à l'échantillonnage. Ce sont les deux types d'erreurs possibles dans l'échantillon.

*Les erreurs d'échantillonnage* proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes intervieweurs et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle l'erreur d'échantillonnage de l'estimation.

*Les erreurs non dues à l'échantillonnage* ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. On cherche à réduire le nombre d'erreurs non dues à l'échantillonnage par une formulation soignée des questionnaires, une vérification attentive des chiffres déclarés, le travail de suivi, l'imputation de données aux unités non répondantes et un contrôle rigoureux des techniques de traitement. Il existe une sous-section de contrôle de la qualité au bureau central qui est chargée de réduire le nombre d'erreurs non dues à l'échantillonnage pour l'EERH et de veiller à ce que les concepts et les définitions soient observés.

## **Indicateurs des erreurs d'échantillonnage**

L'erreur d'échantillonnage reste inconnue, on peut cependant l'estimer à partir de l'échantillon en utilisant une mesure appelée écart-type d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation. Des tableaux d'indicateurs de coefficients de variation sont disponibles sur demande ainsi qu'une note explicative sur la façon de les utiliser pour déterminer la qualité des estimations figurant dans la présente publication.

## ***Non-Sampling Errors***

SEPH has a statistical quality control program at the data capture, structure updating and data editing stages to minimize non-sampling errors. These programs monitor and control the completeness, accuracy and consistency of the reported survey data. Procedures are in place to follow-up for non-response and to impute for those late responses since SEPH publishes estimates only for the two recent months in any particular reference cycle.

## ***Response Rates***

Each month, SEPH releases statistics for the two latest reference months. The "preliminary" month's estimates and the "revised" month's estimates are based on response rates of 80% and 90% respectively for both reporting units and employment.

## ***Characteristics of Non-Respondents and Follow-up***

Firms that do not report data diminish the accuracy of the estimates. Non-response may affect the estimates in different ways. Non-response may be divided into those who refuse to report and those who report "late".

Less than one percent of firms surveyed refuse to report data and most refusals are by small firms. About ten per cent of firms report too late to be included in the estimation process at all. Late reporters tend to be large firms and those using the computer reporting service (CRS) for data collection.

Reporting units, which are non-respondents to the initial mailing, are followed up by telephone by the staff of the regional offices of Statistics Canada. If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## ***Imputation***

Imputation for non-respondent units, which have been in the survey for more than one month, is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each non-respondent.

For the non-responding units that are new to the survey, imputation is based on other sources of

## ***Erreurs non due à l'échantillonnage***

L'EERH comprend un programme de contrôle de la qualité des données qui est appliqué lors de la saisie des données, de la mise à jour des structures et du contrôle des données afin de minimiser les erreurs d'échantillonnage. Ce programme sert à déterminer et à vérifier l'intégrité, la précision et la cohérence des données déclarées. Des mesures sont prévues pour le suivi des cas de non-réponse et pour l'imputation de données dans le cas de déclarations tardives étant donné que les estimations tirées de l'EERH sont publiées seulement pour les deux mois les plus récents de toute période de référence.

## ***Taux de réponse***

Chaque mois, des statistiques de l'EERH sont publiées pour les deux derniers mois de référence. Les estimations "préliminaires" du mois le plus récent et les estimations "révisées" du mois qui le précède sont fondées sur des taux de réponse de 80 % et de 90 % respectivement à la fois pour les unités déclarantes et l'emploi.

## ***Caractéristiques des non-répondants et suivi***

Les entreprises qui ne déclarent pas de données diminuent la précision des estimations. La non-réponse peut influencer sur la valeur des estimations de différentes façons. Les non-répondants peuvent être répartis en deux catégories, soit ceux qui refusent de collaborer et ceux qui remettent leur déclaration en retard.

La proportion des entreprises visées par l'enquête qui ont refusé de fournir des données est inférieure à un pour cent; la plupart des refus sont opposés par les petites entreprises. Environ dix pour cent des entreprises renvoient leur questionnaire trop tard pour que les données puissent être incluses dans le processus d'estimation. Les déclarants tardifs sont habituellement des grandes entreprises et des entreprises qui utilisent le service de déclaration automatisé (SDA) pour la collecte des données.

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Lorsque des unités persistent à ne pas répondre même après le suivi, des données leur sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## ***Imputation***

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui sont visées par l'enquête pour la première fois, l'imputation se fonde sur

information such as the employment intention of the unit and the characteristics of the responding units in the same industry group, province and size. Previous months data are used to impute for establishments with more than 200 employees.

### **Coverage Errors**

Two sources of coverage errors associated with using survey frames relate to duplication and undercoverage. Duplication occurs on the frame when payroll deduction records are unable to be linked to their associated businesses residing on the frame. Undercoverage arises due to the time required to classify and/or link new payroll deduction units.

The Methods and Quality Assurance Section of the Business Register Division produces quality measures to monitor the performance of the frame.

### **Data Edit and Correction**

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics ( e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signalled by the computer edit for review and is subject to correction or acceptance where appropriate.

### **Comparability With Other Data Sources**

#### **Employment**

SEPH payroll employment estimates are frequently compared to the employment estimates provided by the Labour Force Survey (LFS). When comparing the establishment-based SEPH employment estimates to the household-based LFS data, some differences can be quantified and others not. The quantifiable adjustments to the LFS include the addition of multiple job holders and the subtraction of the following: unpaid family workers, self-employed, unpaid absentees (such as workers on strike), incorporated businesses, working partners without employees and the industries excluded from SEPH. The adjustments which are not easily quantifiable include differences,

d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe d'activité économique, de la même province et de la même taille. Les estimations des mois précédents servent à l'imputation des établissements ayant plus de 200 salariés.

### **Erreurs de couverture**

Deux erreurs de couverture découlent des doubles comptes et le sous dénombrement de la base de sondages. Les doubles comptes se produisent dans la base lorsqu'il est impossible de coupler les enregistrements des retenues sur la paye avec les entreprises correspondantes de la base de sondage. Le sous-dénombrement résulte du temps requis pour classer et (ou) coupler les nouvelles unités de retenues sur la paye avec les entreprises correspondantes.

La section des méthodes et du contrôle de la qualité de la division du Registre des entreprises produit des mesures de qualité pour assurer la bonne représentation de la liste des entreprises.

### **Contrôle et correction des données**

Au départ, les intervieweurs des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut être appelé à confirmer ou à expliquer ses chiffres.

Nos procédés de contrôle nous permettent de comparer les valeurs des principales caractéristiques (nombre de salariés, heures travaillées, traitement par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation est constatée ou que les données semblent incohérentes, l'ordinateur signale le cas, et les données de l'enregistrement sont corrigées ou leur exactitude est confirmée, selon le cas.

### **Comparabilité avec d'autres sources de données**

#### **L'emploi**

Les données sur l'emploi de l'EERH sont souvent comparées aux estimations de l'emploi fournies par l'enquête sur la population active (EPA). Lorsque l'on compare les données de l'EPA qui sont fondées sur les ménages et les estimations de l'emploi de l'EERH qui sont basées sur les établissements, certaines différences peuvent être quantifiées et d'autres, non. Les rajustements quantifiables, dont peuvent faire l'objet les estimations de l'EPA, comprennent l'ajout des personnes cumulant des emplois et la suppression des travailleurs familiaux non rémunérés, des travailleurs autonomes, des absents non rémunérés (les travailleurs en grève par exemple), des entreprises constituées en société, des associés actifs dans des entreprises sans salariés et des activités

errors in SIC coding, differences in reference periods, survey procedures and the unrecorded economy. Also, SEPH covers the Northwest Territories while the LFS does not. The LFS data, which focus on demographic characteristics of the labour force, are reasonable measures of trends within broad industry and occupational groups. The SEPH estimates are more suitable as indicators of employment change over detailed industry groups.

According to the 1980 SIC System, public administration (811-837) contains only those establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. SEPH does not publish defence services (811) and includes civilian defence workers in federal administration. Thus, SEPH publishes public administration data that essentially conforms to this definition. Government establishments engaged in activities such as health and education services and transportation and communication services are classified to the appropriate industries. The Public Institutions Division (PID) publishes government employment data that represent all employees of non-commercial entities under the control of a government.

The quantifiable adjustments to the PID data include the addition of Statistics Canada interviewers and the exclusion of military personnel, government personnel working outside of Canada, employees on unpaid absences and government employees assigned to industries other than public administration. The adjustments which are not easily quantifiable include differences in reference periods, survey procedures and the treatment of extra pay periods. The Labour and Public Institution Divisions conduct a reconciliation process to ensure that the public administration data are compatible.

### **Earnings**

The user community generally focuses on two earnings indicators which are often compared to the average weekly and hourly earnings data produced by SEPH. These two earnings indicators are referred to as the Labour Canada base wage rate settlements and the estimates of Wages and Salaries and Supplementary Labour Income produced by the Labour Division in Statistics Canada.

Labour Canada's wage rate indicator data include only unionized workers covered by major collective agreements representing 500 or more employees. For instance, the Labour Canada Base wage rate, as an indicator of wage change, covers about 10% of the overall SEPH employment. Therefore, the value and

économiques non visées par l'EERH. Les rajustements qui ne sont pas facilement quantifiables comprennent le codage selon la CTI, les différences au niveau des périodes de référence, des procédures d'enquête et les données économiques non déclarées. De plus, les données sur les Territoires du Nord-Ouest sont recueillies par l'EERH, mais non par l'EPA. Les données de l'EPA, qui sont axées sur les caractéristiques démographiques de la population active, sont des mesures raisonnables des tendances au niveau des grands groupes d'activités économiques et de professions. Les estimations de l'EERH constituent de meilleurs indicateurs des changements en matière d'emploi pour les groupes détaillés d'activités économiques.

Selon la CTI 1980 l'administration publique (811-837) comprend les établissements dont les activités ont un caractère essentiellement gouvernemental et les organismes auxiliaires assurant les services internes de l'État. Les services de la défense (811) sont exclus de l'EERH sauf les employés civils oeuvrant dans ce ministère. L'EERH publie des données pour l'administration publique par rapport à cette définition. Les établissements à caractère gouvernemental oeuvrant dans le domaine de la santé, l'éducation et le service des transports et de la communication sont classifiés par rapport à leur activité respective. La Division des institutions publiques (DIP), publie des données sur l'emploi pour les entités non-commerciales gérées par le gouvernement.

Les ajustements quantifiables aux données de DIP comprennent les intervieweurs de Statistique Canada mais excluent le personnel militaire, les personnes travaillants, à l'extérieur du Canada, en congé non payé et les personnes dont l'activité est autre que l'administration publique. Les ajustements qui ne sont pas obtenus facilement, comprennent des différences dans la période de référence, les procédures et le traitement des périodes de paye supplémentaire. La Division du travail et la Division des institutions publiques font une réconciliation afin de s'assurer que les données soient compatibles.

### **Gains**

Les utilisateurs optent généralement pour deux indicateurs de rémunération qui sont souvent comparé à la rémunération hebdomadaire et horaire produite par l'EERH. Ces deux indicateurs de rémunération représentent le taux salarial établi de Travail Canada et les estimations des salaires et traitements et du revenu supplémentaire du travail produites par la division du travail de Statistique Canada.

Les données sur le taux salarial de base de Travail Canada ne portent que sur les travailleurs syndiqués visés par des conventions collectives importantes représentant 500 employés ou plus. Plus précisément, le taux de base de Travail Canada, qui sert d'indicateur de l'évolution des traitements, porte sur environ 10% de l'ensemble des données

relevance of the Labour Canada base wage rate as an indicator of wage change should be carefully considered. The estimates of wages and salaries produced by the Labour Income Section are primarily based on annual T-4 supplementary administrative records provided by Revenue Canada Taxation which are projected forward on a monthly/quarterly basis using SEPH and LFS data. Supplementary Labour Income (SLI), which accounts for about 11% of total Labour Income, are not measured by SEPH. SLI includes employer contributions to pensions plans, medical and other welfare plans, Canadian and Quebec Pension Plan and workers' compensation. The labour income estimates, which are a more comprehensive source of employment compensation, do not provide any information on wage rates. The SEPH data for average weekly/hourly earnings as well as Labour Canada's base wage rate statistics are imperfect indicators of wage rate changes because they are subject to compositional shifts by industries, by provinces and changes in underlying rates of pay.

### **Comparability Over Time**

SEPH data have been historically corrected to produce consistent time series from January 1983 to date. The revised time series, which incorporated corrections for major discontinuities, reflect economic change over the 1983-1991 period. By reducing the statistical impacts of sampling and non-sampling errors, the SEPH historically-corrected series can be considered to be more consistent trend measures of payroll employment, earnings and paid hours.

### **Products**

#### **Seasonal Adjustment**

It is common practice to publish most economic indicators in seasonally adjusted and unadjusted forms. Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as usual changes in weather, reduced or expanded production and the opening and closing of schools. Since these seasonal events follow a more or less regular pattern each year, their influence on statistical trends can be eliminated by adjusting the statistics from month-to-month. Seasonal adjustment is imperfect, so if a time series has irregular variation that is larger than the seasonal variation, the seasonally adjusted series will be a poor estimate.

sur l'emploi de l'EERH. Par conséquent, il convient de déterminer avec soin dans quelle mesure le taux salarial de base de Travail Canada s'avère valable et pertinent comme indicateur de la variation des traitements. Les estimations des traitements et salaires produites par la Section du revenu du travail sont fondées en grande partie sur les données des fichiers administratifs renfermant les feuillets annuels T-4 Supplémentaire fournies par Revenu Canada (Impôt); elles font l'objet de projections mensuelles/trimestrielles à l'aide des données de l'EERH et de l'EPA. L'EERH ne mesure pas le revenu supplémentaire du travail (RST), qui représente environ 11% du revenu du travail total. Le RST comprend les cotisations patronales aux régimes de retraite, aux régimes d'assurance-maladie et à d'autres régimes de prévoyance, au Régime de pensions du Canada, au Régime de rentes du Québec et à la caisse d'indemnisation des accidents du travail. Les estimations du revenu du travail, qui brossent un tableau plus complet de la rémunération du travail, ne fournissent pas de renseignements sur les taux de traitement. Les données de l'EERH sur les gains hebdomadaires/horaires moyens et les données sur le taux salarial de base de Travail Canada sont des indicateurs imparfaits de l'évolution des taux de traitement du fait qu'elles sont touchées par des variations dans la répartition des unités selon l'activité économique et la province, et par des changements dans les taux de rémunération sous-jacents.

### **Comparabilité dans le temps**

Les données de l'EERH ont été corrigées à partir de janvier 1983 de façon à assurer la cohérence des séries chronologiques à date. Les séries chronologiques révisées, qui comportaient des ruptures importantes, donnent maintenant un meilleur aperçu de l'évolution économique pour 1983-1991. Maintenant que l'incidence statistique des erreurs d'échantillonnage et des erreurs non dues à l'échantillonnage a été réduite, les séries chronologiquement révisées de l'EERH constituent des mesures plus cohérentes des tendances relatives à l'emploi, à la rémunération et aux heures de travail.

### **Produits**

#### **Désaisonnalisation**

Il est de pratique courante de publier la plupart des indicateurs économiques sous forme désaisonnalisée et non désaisonnalisée. Les fluctuations relevées dans les séries chronologiques d'ordre économique sont causées par des mouvements saisonniers, cycliques et irréguliers. Dans une série désaisonnalisée, les mouvements saisonniers ont été supprimés. Les mouvements saisonniers sont définis comme étant ceux qui sont causés par des événements qui se produisent chaque année, par exemple les changements climatiques habituels, le ralentissement ou l'accroissement de la production, et l'ouverture et la fermeture des établissements d'enseignement. Comme ces événements saisonniers se produisent à des intervalles annuels assez réguliers, leur incidence sur les tendances statistiques peut être supprimée en rectifiant les statistiques d'un mois à l'autre.

In the opinion of the Time Series Division of Statistics Canada, the unadjusted series will probably be a better estimate than the poorer seasonally adjusted series.

### ***Fixed-Weighted Earnings Index***

A set of fixed-weighted average hourly and weekly earnings index data has been constructed to deal with the impact of changes in the employment mix between industries, provinces/territories and salaried and hourly employees. This index provides a better indicator of the underlying trends in wage rates than the variable weighted earnings series.

This data series corrects the compositional changes of employment by re-aggregating SEPH survey information using fixed rather than variable weights for the paid hours. Overtime is excluded because it is an important source of compositional change in some industries. Statistics Canada's time base year for any index, such as the CPI, is 1986=100. Thus, for consistency purposes, the time base year for the fixed-weighted earnings index is the same.

### ***Diffusion Index***

The diffusion index measures the dispersion of change for the SEPH variables and represents the fraction of industries which had year-over-year increases in the value of a variable. The SEPH diffusion index data are available for selected industry groups for Canada employment, average weekly hours, average hourly earnings and average weekly earnings adjusted for inflation.

The diffusion index can be used to assess how broad based a change in level is for SEPH variables such as employment or average weekly hours for the Industrial Aggregate. The index is particularly useful in analyzing trends in cyclically-sensitive industries such as manufacturing and trade.

### ***Revision Policy***

On a monthly basis, the preliminary data will be revised in the following month. On an annual basis, seasonally-adjusted and raw data will be revised with the release of the December revised data for the calendar year. The SEPH Program will keep up to 4 years open for revision to coincide with the revisions made every June by the Canadian System of National Accounts Divisions in Statistics Canada.

From time to time, an historical revision is necessary for changes related to new data sources and revised industry classifications and frame changes.

La désaisonnalisation n'est pas parfaite; alors si une série chronologique présente des variations irrégulières plus importantes que les variations saisonnières, cette série désaisonnalisée sera une pauvre estimation. D'après la Division des séries chronologiques de Statistique Canada, il est alors préférable d'utiliser une série non désaisonnalisée.

### ***Indice des gains à pondération fixe***

La série à pondération fixe des gains horaires et hebdomadaires moyens a été conçue pour traiter l'impact des changements dans l'emploi entre; les industries, provinces/territoires, les employés et les employés payés à l'heure. Cet indice est un meilleur indicateur des tendances des gains à celles des gains pondérés.

Il s'agit d'une série de données qui corrige les changements dans la composition de l'emploi en groupant différemment les données de l'EERH au moyen d'une pondération fixe plutôt que variable pour les heures payées. Le temps supplémentaire est exclu parce que cet élément influe de façon considérable sur la composition de l'emploi pour certaines activités économiques. L'année de référence déterminée par Statistique Canada pour tout indice, par exemple l'IPC, est 1986=100. Par conséquent, c'est aussi celle qui a été établie pour l'indice des gains à pondération fixe, pour assurer la cohérence.

### ***Indice de diffusion***

L'indice de diffusion indique l'ampleur des changements intervenues au niveau des variables de l'EERH et représente la fraction des industries pour lesquelles on a enregistré une croissance annuelle de la valeur de cette variable. Les indices de diffusion rendus disponibles par l'EERH sont l'emploi au Canada, les heures hebdomadaires moyennes travaillées, la rémunération horaire et hebdomadaire moyenne après correction pour l'inflation.

Les indices de diffusion permettent de repérer la tendance générale adoptée par les variables de l'enquête tel que l'emploi ou les heures hebdomadaires moyennes pour l'ensemble des industries. L'indice est particulièrement apprécié dans l'analyse des tendances au niveau des industries plus sensibles aux mouvements cycliques tel que les industries manufacturières et le commerce.

### ***Politique de révision***

Sur une base mensuelle, les données préliminaires seront révisées le mois suivant. Par contre, la révision des données désaisonnalisées et non-désaisonnalisées se fera sur une base annuelle, c'est-à-dire avec la parution des données révisées du mois de décembre de l'année en cours. Afin de coïncider avec les révisions de juin de les divisions du Système canadien de comptabilité nationale de Statistique Canada, l'EERH se réserve une période ouverte de quatre ans.

A l'occasion, une révision historique devient nécessaire. Cela est dû aux nouvelles sources de données, une classification d'industries révisées et au changement à la base de sondage.

## **Products and Services**

This publication contains a selection of data available from the Survey of Employment, Payrolls and Hours.

A labour market consultant will be pleased to help you design your own table for your additional data requirements. Please call (613) 951-4090 or fax your request to (613) 951-4087.

Before the introduction of SEPH in 1983, three main sources were used to collect employment, earnings and hours data: the Employment, Payrolls and Manhours Survey (ES-1) (survey of large firms in commercial industries), the Employment Sample Survey (ES-2) (survey of small firms in commercial industries), and other employment surveys covering institutions and organizations in the non-commercial sector (GAP) (survey of education, health and welfare, and religious organizations). For more information on linking SEPH data with the ES-1 and ES-2, please contact our labour market consultants.

The data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). For further information on CANSIM call (613) 951-8200 or your nearest regional office.

### **Confidentiality**

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected. An industry for a geography is deemed confidential if the number of respondents is small, or if only a few of the respondents are reporting a very large majority of the employment, while the majority of the respondents are reporting only a few employees each.

For detailed information on the methodology of SEPH, documents are available from the SEPH Dissemination Unit.

## **Produits et services**

La présente publication contient une sélection de données disponibles de l'enquête sur l'emploi, la rémunération et les heures de travail.

Un conseiller en marché du travail se fera un plaisir de vous aider à créer votre propre tableau pour répondre à vos besoins additionnels en données. Veuillez téléphoner au (613) 951-4090 ou envoyer votre demande par télécopieur au (613) 951-4087.

Avant la réalisation de l'EERH en 1983, les données sur l'emploi, la rémunération et les heures de travail provenaient de trois grandes sources : l'enquête sur l'emploi, la rémunération et les heures-hommes (ES-1) (enquête auprès des grandes entreprises des branches d'activité commerciale), l'enquête-échantillon sur l'emploi (ES-2) (enquête auprès des petites entreprises des branches d'activité commerciale), et d'autres enquêtes sur l'emploi portant sur les établissements institutionnels et les organismes du secteur non commercial (GAP) (enquêtes menées auprès d'organismes religieux et dans les domaines de l'éducation, de la santé et du bien-être). Pour plus de renseignements sur le couplage des données de l'EERH et de celles de ES-1 et de ES-2, veuillez communiquer avec nos conseillers en marché du travail.

Les données qui paraissent dans la présente publication sont aussi disponibles sous forme ordiolingué dans CANSIM (Système canadien d'information socio-économique). Pour de plus amples renseignements sur CANSIM, veuillez téléphoner au (613) 951-8200 ou au bureau régional le plus près.

## **Référence**

### **Confidentialité**

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises. Une industrie, pour une géographie est considérée confidentielle si la quantité de répondants est petite ou si seulement quelques répondants représentent la majorité de l'emploi alors que la plus grande partie des répondants représentent seulement quelques employés chacun.

Des documents contenant des renseignements plus détaillés sur la méthodologie de l'EERH peuvent être obtenus en communiquant avec l'Unité de diffusion.

Please note that Statistics Canada has entered into data sharing agreements, pursuant to section 11 of the Statistics Act, with the statistical agencies in the provinces of British Columbia, Manitoba, Ontario, Quebec and New Brunswick and pursuant to Section 12 with the Executive Council of the Northwest Territories. Under Section 12 of the Statistics Act, you may refuse to share your information by writing to the Chief Statistician and returning your letter of objection along with the completed questionnaire in the enclosed return envelope.

Veuillez noter que Statistique Canada a conclu des accords de partage de données en vertu de l'article 11 de la Loi sur la statistique avec les agences statistiques des provinces suivantes : Colombie-Britannique, Manitoba, Ontario, Québec et Nouveau-Brunswick et aux termes de l'article 12, avec le Conseil exécutif des Territoires du Nord-Ouest. En vertu de l'article 12 de la Loi sur la statistique, vous pouvez refuser de partager vos renseignements en communiquant votre décision par écrit au statisticien en chef et en renvoyant votre lettre avec le questionnaire rempli dans l'enveloppe de retour ci-jointe.

# PICK A TOPIC ... ANY TOPIC

The 1993 *Statistics Canada Catalogue* is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the *Catalogue* will point you in the right direction.

From the most popular topics of the day - like employment, income, trade, and education - to specific research studies - like mineral products shipped from Canadian ports and criminal victimization in urban areas - you'll find it all here.

... the 1993 *Statistics Canada Catalogue* will help you get your bearings ...

The *Catalogue* puts all this information at your fingertips. With the expanded index, you can search by subject, author or title - even periodical articles are indexed. There's also a separate index for all our electronic products.

The *Catalogue* has everything you need to access all Statistics Canada's products:

- descriptions of over 200 new titles, plus succinct abstracts of the over 900 titles and 7 map series already produced;
- newly released 1991 Census products;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and advice on getting expert assistance on electronic products and on-line searches;
- tabs to each section - so you can immediately flip to the information you need.

... time and time again

To make sure that the *Catalogue* stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today - you'll be lost without it.

# CHOISISSEZ UN SUJET ... N'IMPORTE LEQUEL

Le *Catalogue de Statistique Canada 1993* est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le *Catalogue* vous mettra sur la bonne piste.

Des sujets actuels les plus populaires - comme l'emploi, le revenu, le commerce et l'éducation - à des études de recherche spécialisées - comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines - vous trouverez tout dans ce document.

... le *Catalogue de Statistique Canada 1993* vous aidera à vous orienter ...

Le *Catalogue* vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre - les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le *Catalogue* a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

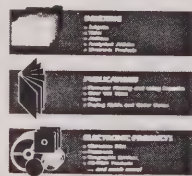

- descriptions de plus de 200 nouveaux titres et courts résumés des 900 titres et plus et des 7 séries de cartes déjà disponibles;
- produits du Recensement de 1991 récemment publiés;
- un guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour les produits électroniques et les recherches en direct;
- système d'onglets pour chaque section - pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le *Catalogue* puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui - vous ne pourrez plus vous passer de lui.

# DID YOU KNOW...

**THAT CANADIAN EXPORTS OF NATURAL GAS IN 1990 WERE 80% HIGHER THAN IN 1980?**

**D**ue to the unpredictable nature of the energy industry, many reference publications are outdated by the time they're published. Not this one! With the certainty of change in the energy picture, you need a source that remains current and complete.

The *Energy Statistics Handbook* is the most complete source of detailed information on the energy field. This publication is designed to work for you! Your subscription includes:

- An attractive, easy-to-use binder — keep it on your bookshelf or beside your telephone.
- Section dividers to organize the monthly updates which enable you to rapidly access the facts you need.
- A monthly 200-page update from Statistics Canada that ensures your facts are the most recently released for this rapidly changing sector.

Data is organized by energy type: total energy, petroleum, natural gas, electricity, uranium and coal. Additional sections include prices and conversion factors. Along with up-to-date information, you'll find historical data going back 10 years, so you can compare trends over time.

Executives, research and development professionals and environmentalists use the *Energy Statistics Handbook* to add authority to their industry analysis, plans and corporate reports.

Subscribe to the *Energy Statistics Handbook* today!

The *Energy Statistics Handbook* (Cat. #10-602) is \$300 in Canada, US\$360 in the United States and US\$420 in other countries.

For faster ordering, call 1-800-267-6677 and use your VISA, MasterCard or Purchase Order number.

# SAVIEZ-VOUS...

**QUE LES EXPORTATIONS CANADIENNES DE GAZ NATUREL ÉTAIENT 80 % PLUS ÉLEVÉES EN 1990 QU'EN 1980?**

**E**n raison de la nature imprévisible de l'industrie de l'énergie, de nombreuses publications de référence sur le sujet sont déjà périmées lorsqu'elles paraissent. Mais pas celle-ci! Le monde de l'énergie est en constante évolution, aussi vous avez besoin d'une source de référence qui soit toujours d'actualité et complète.

Le *Guide statistique de l'énergie* est la source la plus complète de renseignements exacts sur le domaine de l'énergie. Cette publication est conçue pour travailler pour vous! Votre abonnement comprend :

- Un classeur attrayant et facile à consulter — vous pouvez le garder dans votre bibliothèque ou à côté de votre téléphone;
- Des sections ordonnées selon les mises à jour mensuelles, ce qui vous permet de trouver rapidement les faits dont vous avez besoin;
- Une mise à jour mensuelle de 200 pages de Statistique Canada qui vous assure d'avoir en main les faits les plus récents qui soient sur ce secteur qui change continuellement.

Les données sont classées selon le type d'énergie : l'énergie totale, le pétrole, le gaz naturel, l'électricité, l'uranium et le charbon. D'autres sections traitent des prix et des facteurs de conversion. En plus d'une information actuelle, vous y trouverez des données historiques des dix dernières années, afin que vous puissiez comparer les tendances à travers le temps.

Les cadres, les professionnels de la recherche et du développement et les écologistes utilisent le *Guide statistique de l'énergie* pour ajouter du poids à leur analyse de l'industrie, leurs projets et à leurs rapports de société.

Abonnez-vous dès aujourd'hui au *Guide statistique de l'énergie*!

Le *Guide statistique de l'énergie* (N° 10-602 au Cat.) coûte 300\$ au Canada, 360 \$ US aux États-Unis et 420 \$ US dans les autres pays.

# INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?

Then **Canadian Social Trends** is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, **Canadian Social Trends** looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, **Canadian Social Trends** provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, **Canadian Social Trends** also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

## CANADIAN SOCIAL TRENDS

(Catalogue No. 11-008E) is \$34 annually in Canada, US\$40 in the United States and US\$48 in other countries.

To order, write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free 1-800-267-6677 and use your VISA or MasterCard.

# VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEUVRE ORIGINALE?

Alors **Tendances sociales canadiennes** est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, **Tendances sociales canadiennes** brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, **Tendances sociales canadiennes** dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

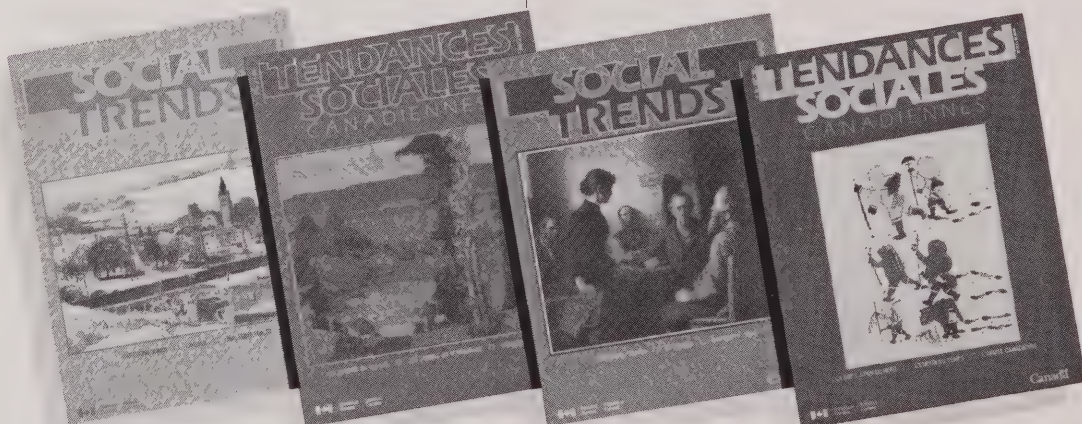

**Tendances sociales canadiennes** présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

## TENDANCES SOCIALES CANADIENNES
